(57) **CLAIM**

The ornamental design for a display panel with graphical user interface and dynamic display icons, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee.

The figures of the drawing show a single transitional design in an exemplary sequence. The design is transitional in nature and the scope of the claim does not include anything that is not shown.

FIG. 1 is a plan view of the display panel with graphical user interface and dynamic display icons showing my new invention;

FIG. 2 is a plan view thereof, showing the design after a transition in the sequence;

FIG. 3 is a plan view thereof, showing the design after a further transition in the sequence;

FIG. 4 is a plan view thereof, showing the design after a further transition in the sequence;

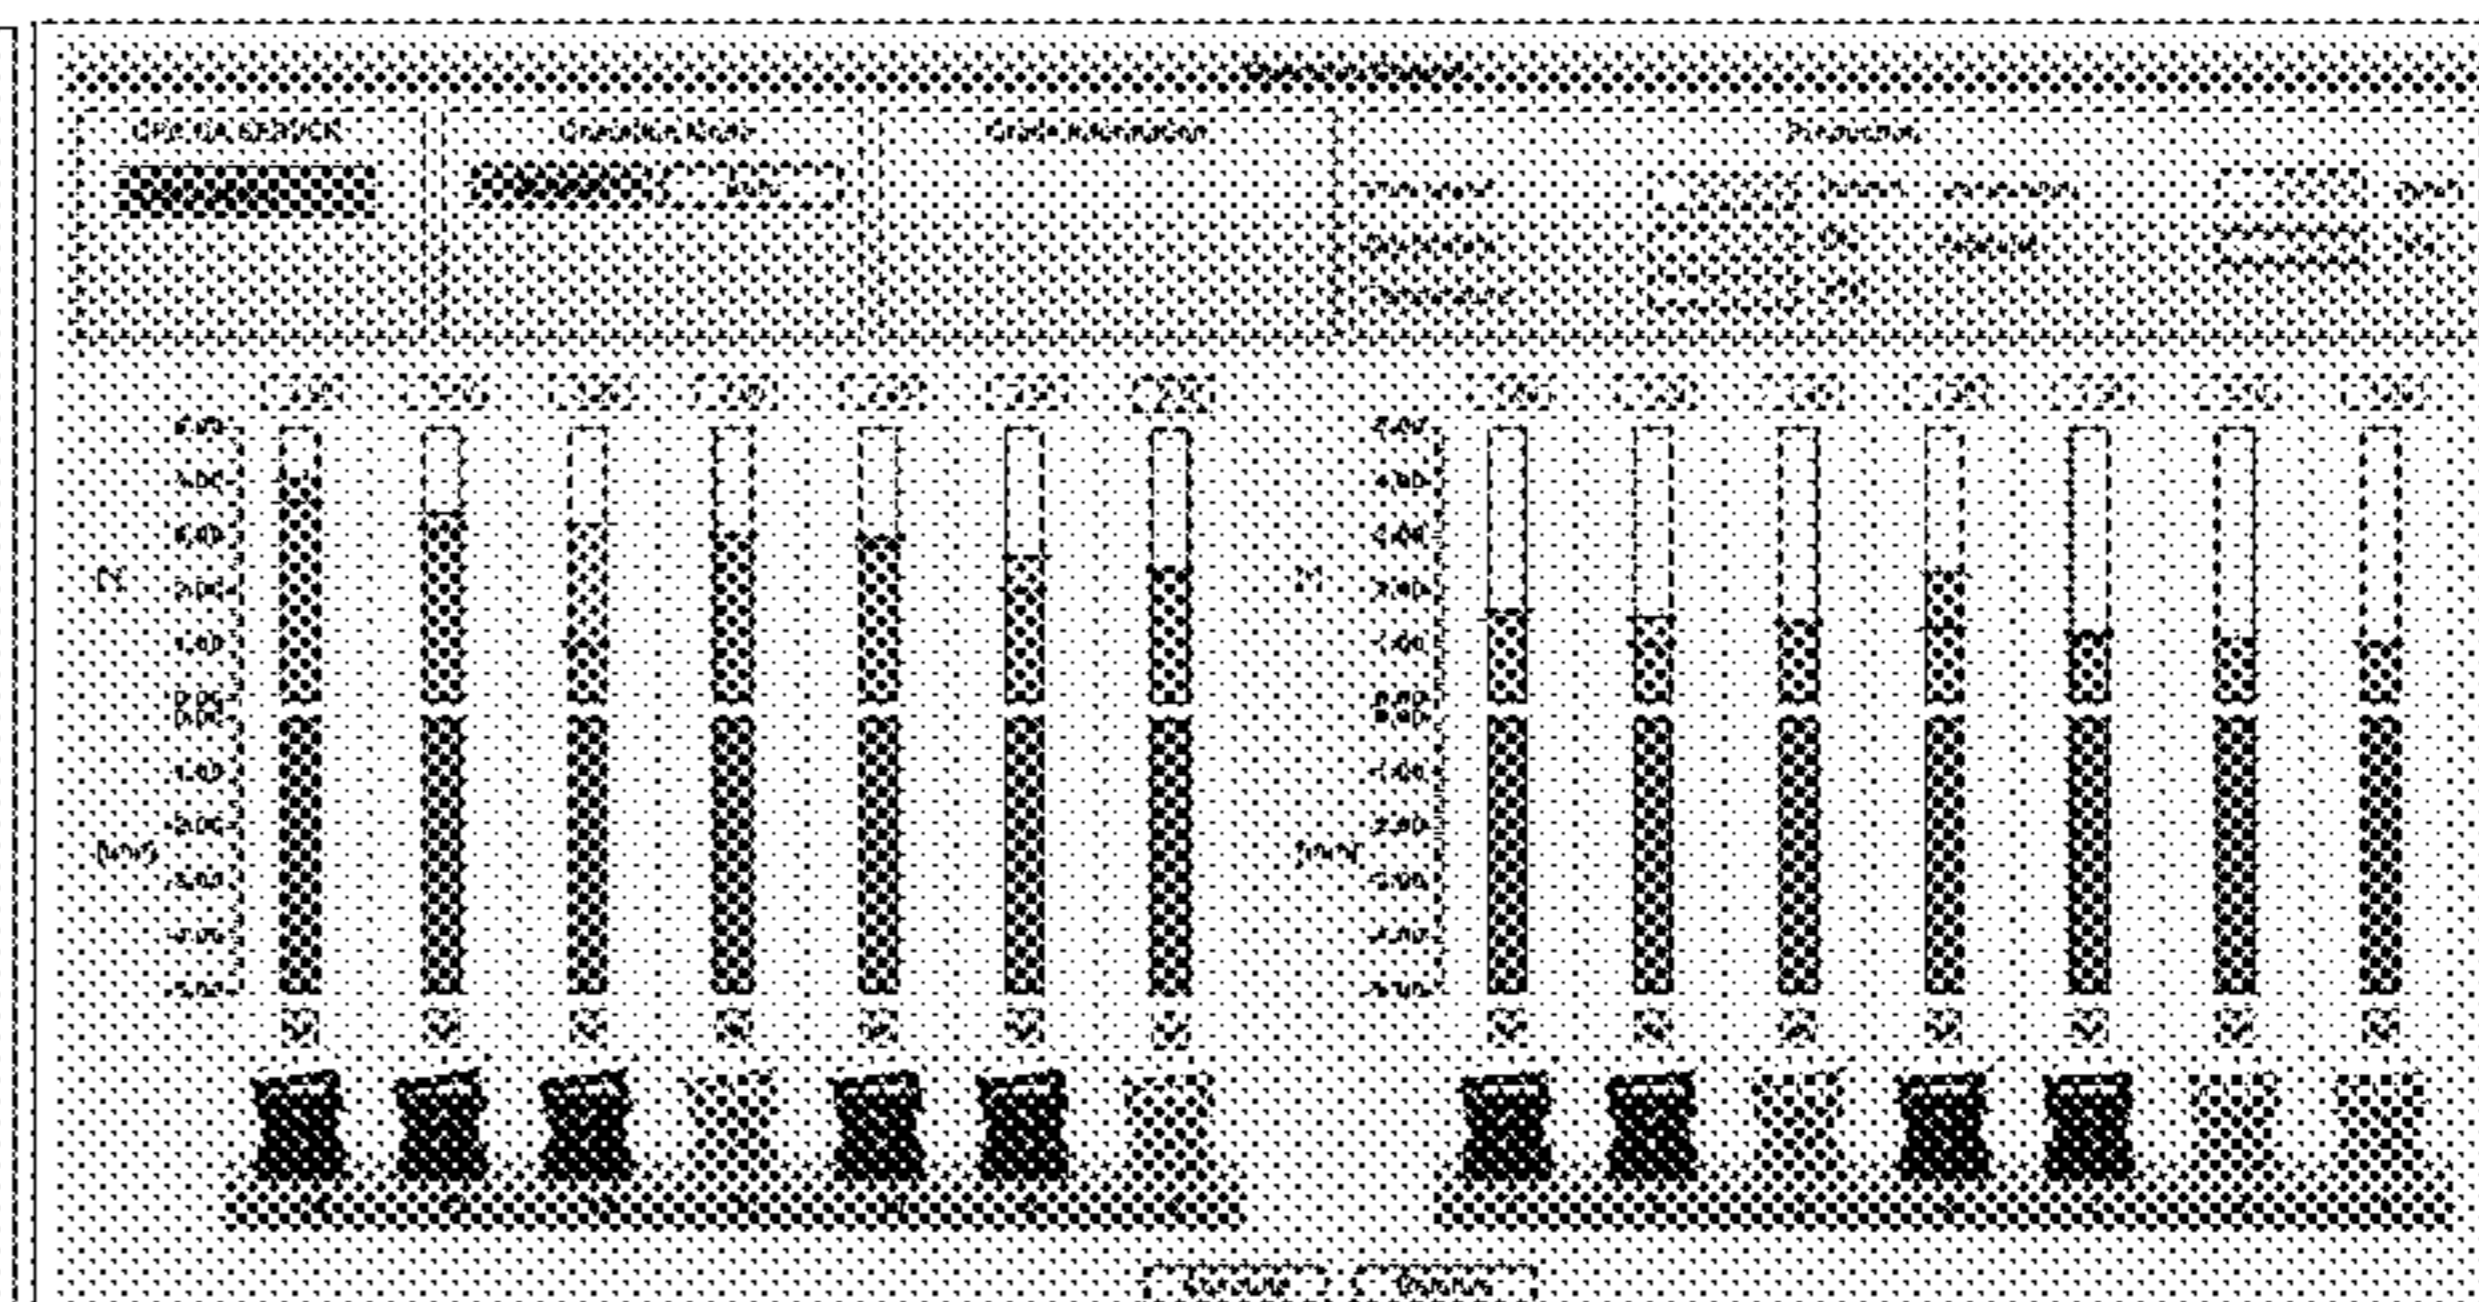

FIG. 5 is a plan view thereof, showing the design after a further transition in the sequence;

FIG. 6 is a plan view thereof, showing the design after a further transition in the sequence; and,

FIG. 7 is a plan view thereof, showing the design after yet a further transition in the sequence.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-7. The process

(Continued)

or period in which one image transitions to another image forms no part of the claimed design.
