(57) **CLAIM**

The ornamental design for a headlight for an automobile, as shown and described.

DESCRIPTION

FIG. 1 is an outside elevational view of a headlight for an automobile in accordance with a first embodiment of my new design;

FIG. 2 is an inside elevational view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a front side elevational view thereof;

FIG. 6 is a rear side elevational view thereof; and,

FIG. 7 is a front side perspective view thereof.

The headlight is configured to be mounted to an automobile. The mounting structure and support structure of the headlight, shown in broken lines in FIGS. 1 to 7, form no part of the claimed design since the mounting structure and support structure are hidden when the headlight is mounted to the automobile.

In addition, the appearance of the rear side structures and inside structures of the headlight as shown in broken lines in FIGS. 1 to 7 is for purpose of illustrating the boundaries of the exterior surface of the outside of the headlight, and forms no part of the claimed design. The headlight has a front lens that is transparent such that features behind the lens are at least partially visible as illustrated.

A second embodiment of my new design includes the mirror image of the headlight shown in FIGS. 1 to 7.

1 Claim, 7 Drawing Sheets
