(57) **CLAIM**

The ornamental design for a display screen of a modular infusion device with transitional graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first image of a display screen or portion thereof of a modular infusion device with transitional graphical user interface, showing the new design; and, FIG. 2 is a front view of a second image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2. The process or period in which an image transitions to another image forms no part of the claimed design.

The outermost broken-line rectangle illustrates the perimeter of a display screen or portion thereof and forms no part of the claimed design. The remaining broken lines illustrate portions of a graphical user interface and form no part of the claimed design.
