(57) **CLAIM**

I claim the ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with graphical user interface, showing a first embodiment of the new design;

FIG. 2 is a second embodiment thereof;

FIG. 3 is a third embodiment thereof;

FIG. 4 is a fourth embodiment thereof; and,

FIG. 5 is a fifth embodiment thereof.

The outermost broken lines illustrate a display screen and form no part of the claimed design. The remaining broken lines illustrate portions of a graphical user interface and form no part of the claimed design.

1 Claim, 5 Drawing Sheets

The screenshot displays a web-based interface for crop insurance. At the top, there are navigation icons (home, tools, people, location) and a search bar. The main content is divided into two sections: 'CORN Coverage' and 'WHEAT Coverage'. Each section has a 'CURRENT' and 'UPDATED' table comparing different policy options. For Corn, the 'CURRENT' table shows a 65% PP policy with a premium of \$13.99, while the 'UPDATED' table shows a 75% PP policy with a premium of \$10.50. The 'WHEAT' section follows a similar structure. To the right of these tables are checkboxes for 'MULTI-PERIL', 'CROP HAIL', and 'OTHER ENDORSEMENTS'. A 'RENEW POLICY' button is at the bottom center. On the right side, there is a vertical toolbar with icons for zooming, panning, and other UI functions.
