The ornamental design for a display screen or portion thereof having an animated graphical user interface for list scrolling, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image of the display screen or portion thereof having an animated graphical user interface for list scrolling showing my new design; FIG. 2 is a front view of a second image thereof; FIG. 3 is a front view of a third image thereof; FIG. 4 is a front view of a fourth image thereof; and, FIG. 5 is a front view of a fifth image thereof.

In a first embodiment of the claimed design, the appearance of the animated images transitions successively between the images shown in FIGS. 1-5. A second embodiment of the claimed design of FIGS. 1-5 is shown in reverse succession as FIGS. 5-1. The process or period in which one image transitions to another forms no part of the claimed design.
