(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with transitional graphical user interface showing a first image of our new design; and,
 FIG. 2 is a second image thereof.
 The appearance of the transition is sequential from FIG. 1 to FIG. 2. The process or period in which an image transitions to another image forms no part of the claimed design.
 The shading is part of the claimed design.
 The outermost broken lines showing an electronic device illustrate environmental structure. The remaining broken lines, including the broken line rectangle showing the display screen and the broken lines illustrating portions of the graphical user interface, illustrate portions of the article of manufacture. None of the broken lines form part of the claimed design.
