(57) **CLAIM**

The ornamental design for a blood storage device with two access openings, as shown and described.

DESCRIPTION

FIG. **1** is a perspective view of a blood storage device with two access openings embodying the design.

FIG. **2** is a view of the front side of the device shown in FIG. **1**; and,

FIG. **3** is a view of the rear side of the device shown in FIG. **1**.

The dash lines depict the boundaries of the claim and form no part thereof. The short dash-short dash-long dash broken lines, and the areas bounded by both solid lines and short dash-short dash-long dash broken lines, depict portions of the blood storage device with two access openings that form no part of the claimed design.
