(57) **CLAIM**

The ornamental design for a tire tread, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire including the tire tread of the present application;

FIG. 2 is a front view thereof;

FIG. 3 is a side view thereof;

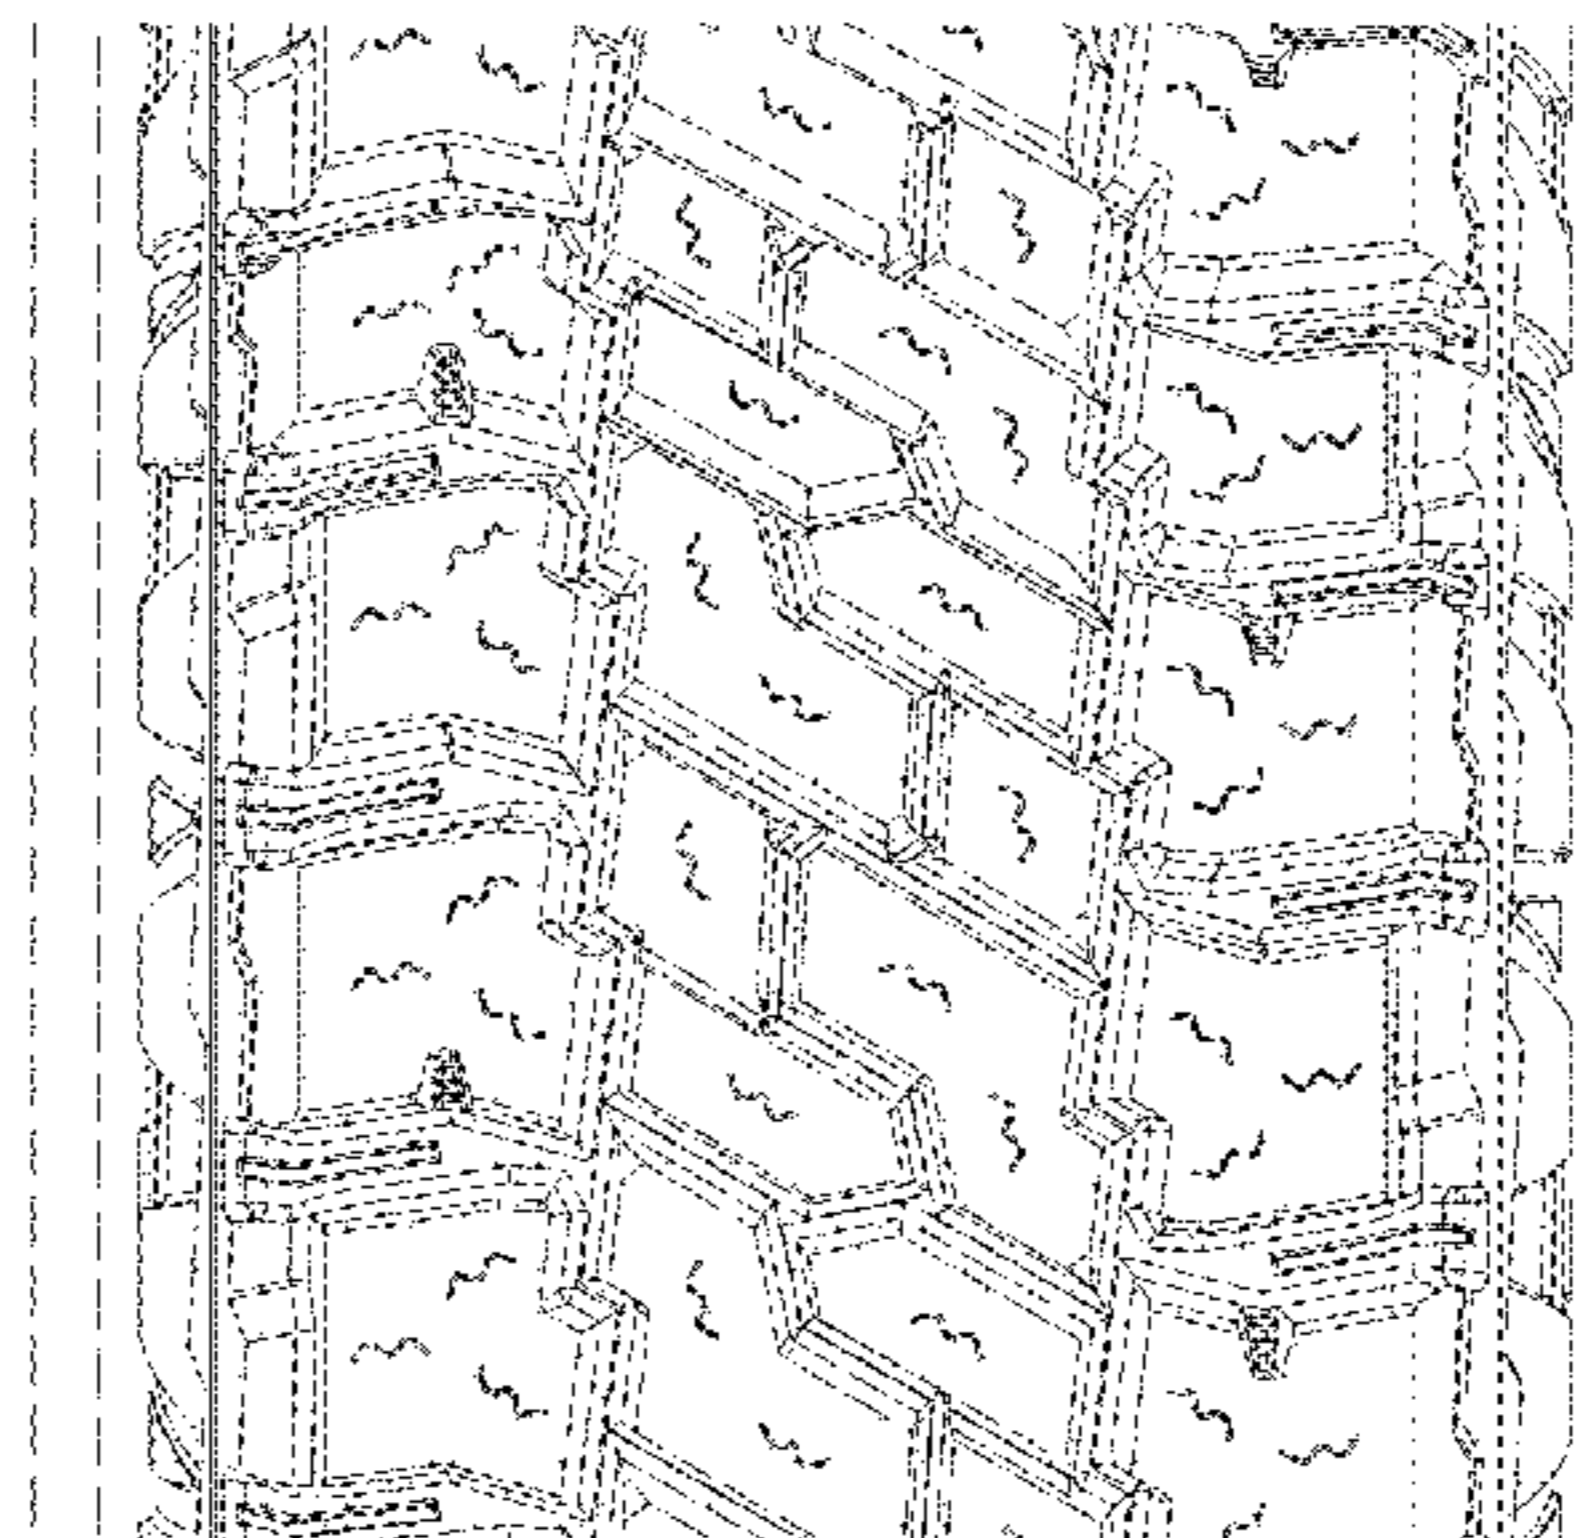

FIG. 4 is an enlarged partial, perspective view thereof;

FIG. 5 is an enlarged, partial front view thereof; and,

FIG. 6 is an enlarged, partial side view thereof.

The broken lines and the region between the broken lines defining the inner bead and the first (or second) sidewall depicts subject matter that forms no part of the claimed tire tread design, and is included for the purpose of illustrating the full tire. The outer-most circumferential broken line adjacent to the solid lines of the tire buttress represents the boundary of the claim and forms no part of the claimed design. Likewise, the tire interior forms no part of the claim. The tread pattern is understood to repeat throughout the circumference of the tire. The second side is the same as the first side.

1 Claim, 6 Drawing Sheets
