CLAIM

We claim the ornamental design for an ophthalmic neural scanner, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an ophthalmic neural scanner showing our new design.

FIG. 2 is a front elevational view of the ophthalmic neural scanner.

FIG. 3 is a rear elevational view of the ophthalmic neural scanner.

FIG. 4 is a right side elevational view of the ophthalmic neural scanner.

FIG. 5 is a left side elevational view of the ophthalmic neural scanner.

FIG. 6 is another perspective view of the ophthalmic neural scanner.

FIG. 7 is a top plan view of the ophthalmic neural scanner; and,

FIG. 8 is a bottom plan view of the ophthalmic neural scanner.

The broken lines in the Figures show portions of the ophthalmic neural scanner that form no part of the claimed

design. Any surface shading is used solely to show the character or contour of the surfaces represented.
