(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence according to the claimed design; and, FIG. 2 is a front view showing a second image thereof. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2. The process or period in which one image transitions to another image forms no part of the claimed design. Shaded portions of the graphical user interface depict a contrast in appearance. The longer outer-most broken lines showing an electronic device illustrate environmental subject matter. The broken line rectangle showing a display screen, and all other broken lines showing elements of the graphical user interface illustrate portions of the article. None of the aforementioned broken line subject matter forms part of the claimed design. The narrow double lines, including a broken line segment at the left end of the lower line beneath the two smaller boxes in FIG. 2, do form part of the claimed design.

1 Claim, 2 Drawing Sheets
