(57) **CLAIM**

The ornamental design for a display screen of a wearable device with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view showing a first image of a display screen of a wearable device with transitional graphical user interface in a first embodiment showing our new design; FIG. 2 is a front view showing a first image of a display screen of a wearable device with transitional graphical user interface in a second embodiment; FIG. 3 is a front view showing the second image of the first embodiment; and, FIG. 4 is a front view showing the second image of the second embodiment.

The subject matter in this application includes a process or period in which the images sequentially transition between FIG. 1 and FIG. 3, and between FIG. 2 and FIG. 4. The process or period forms no part of the claimed design. The broken lines shown in the drawings depict portions of the display screen of a wearable device with transitional graphical user interface that form no part of the claimed design.
