(Continued)

FIG. 1 is a front perspective view of a cart apparatus with a top support having a plurality of openings according to the design with a door in an open position;  
FIG. 2 is a front perspective view thereof with containers fully disposed through each of the plurality of openings and through an intermediate support;  
FIG. 3 is a front perspective view thereof with the door in an alternative closed position and with a container partially disposed through one of the plurality of openings;  
FIG. 4 is a front perspective view thereof with the door in an alternative closed position;  
FIG. 5 is a front view thereof with the door in the alternative closed position of FIG. 4;  
FIG. 6 is a rear view thereof with the door in the alternative closed position of FIG. 4;  
FIG. 7 is a right side view thereof with the door in the alternative closed position of FIG. 4;  
FIG. 8 is a left side view thereof with the door in the alternative closed position of FIG. 4;  
FIG. 9 is a top view thereof with the door in the alternative closed position of FIG. 4; and,  
FIG. 10 is a bottom view thereof with the door in the alternative closed position of FIG. 4.
