(57) **CLAIM**

The ornamental design for a tire tread, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a tire tread of the present application taken generally from the front and a first side of the tire;

FIG. 2 is a front view thereof (and the top, bottom, and rear views are the same based on the repeating nature of the tread design pattern throughout the circumference of the tire);

FIG. 3 is the first side view thereof (and the second side is the same as the first side);

FIG. 4 is an enlarged, partial perspective view thereof taken generally from the front and the first side of the tire;

FIG. 5 is an enlarged, partial front view thereof; and,

FIG. 6 is an enlarged, partial side view thereof.

The claimed design extends to the broken line nearest the ground engaging tread surface but does not include that broken line; the broken lines depict subject matter that forms no part of the claimed tire tread design, and are included for the purpose of illustrating the full tire. Likewise, the tire interior forms no part of the claim. The tread pattern is understood to repeat throughout the circumference of the tire.
