(57) **CLAIM**

The ornamental design for a tire tread, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of the tire tread of the present application taken generally from the front and a first side of the tire;  
 FIG. 2 is a front view thereof;  
 FIG. 3 is a side view (the first side or the second side) thereof;  
 FIG. 4 is an enlarged partial, perspective view taken generally from the front and the first side thereof;  
 FIG. 5 is an enlarged, partial front view thereof; and,  
 FIG. 6 is an enlarged, partial side view (the first side or the second side) thereof.

The claimed design extends to the broken line nearest the ground engaging tread surface but does not include that broken line; the broken lines depict subject matter that forms no part of the claimed tire tread design, and are included for the purpose of illustrating the full tire. Likewise, the tire interior forms no part of the claim. The tread pattern is understood to repeat throughout the circumference of the tire.
