(57) **CLAIM**

The ornamental design for a display screen or portion thereof with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with transitional graphical user interface showing the first image in a sequence.

FIG. 2 is the second image thereof.

FIG. 3 is the third image thereof.

FIG. 4 is the fourth image thereof; and,

FIG. 5 is the fifth image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-5. The process or period in which one image transitions to another image forms no part of the claimed design.

The claim is directed towards the three rectangles illustrated with solid lines near the center of the display screen and the hatching going from the upper right to the lower left within these rectangles. The outermost broken line rectangle in each figure illustrates a display screen or portion thereof and forms no part of the claimed design. The remaining broken lines in the drawings, including all text shown and all hatching going from the upper left to the lower right, illustrate portions of the graphical user interface and form no part of the claimed design.
