DESCRIPTION

FIG. 1 is a top, front, and right-side perspective view of a configurable strap accessory for a mobile communications device, showing our new design in a first configuration; FIG. 2 is a top, front, and right-side perspective view of the present design in a second configuration; FIG. 3 is a top, front, and right-side perspective view of the present design in the first configuration. FIG. 4 is a back elevation view of the present design in the first configuration. FIG. 5 is a front elevation view of the present design in the first configuration. FIG. 6 is a bottom plan view of the present design in the first configuration. FIG. 7 is a top plan view of the present design in the first configuration. FIG. 8 is right-side elevation view of the present design in the first configuration. FIG. 9 is left-side elevation view of the present design in the first configuration. FIG. 10 is a top, front, and right-side perspective view of the present design in the second configuration. FIG. 11 is a back elevation view of the present design in the second configuration. FIG. 12 is a front elevation view of the present design in the second configuration. FIG. 13 is a bottom plan view of the present design in the second configuration. FIG. 14 is a top plan view of the present design in the second configuration. FIG. 15 is right-side elevation view of the present design in the second configuration; and, FIG. 16 is left-side elevation view of the present design in the second configuration.

(Continued)

The broken lines depicting portions of a mobile communications device represent environmental subject matter that forms no part of the claimed design.
