(57) **CLAIM**

We claim the ornamental design for a firearm stock portion, as shown and described.

DESCRIPTION

FIG. 1 is a right side view of a firearm stock portion showing the new design.

FIG. 2 is a left side view of the firearm stock portion.

FIG. 3 is a right side view of the firearm stock portion.

FIG. 4 is a left side view of the firearm stock portion.

FIG. 5 is a right side view of the firearm stock portion.

FIG. 6 is a left side view of the firearm stock portion.

FIG. 7 is a right side view of the firearm stock portion.

FIG. 8 is a left side view of the firearm stock portion.

FIG. 9 is a right side view of the firearm stock portion.

FIG. 10 is a left side view of the firearm stock portion.

FIG. 11 is a right side view of a firearm stock portion showing the new design.

FIG. 12 is a left side view of the firearm stock portion.

FIG. 13 is a right side view of the firearm stock portion.

FIG. 14 is a left side view of the firearm stock portion.

FIG. 15 is a right side view of the firearm stock portion.

FIG. 16 is a left side view of the firearm stock portion.

FIG. 17 is a right side view of the firearm stock portion.

FIG. 18 is a left side view of the firearm stock portion.

FIG. 19 is a right side view of the firearm stock portion.

FIG. 20 is a left side view of the firearm stock portion.

FIG. 20 is a left side view of the firearm stock portion.

FIG. 21 is a right side view of a firearm stock portion showing the new design.

FIG. 22 is a left side view of the firearm stock portion.

(Continued)

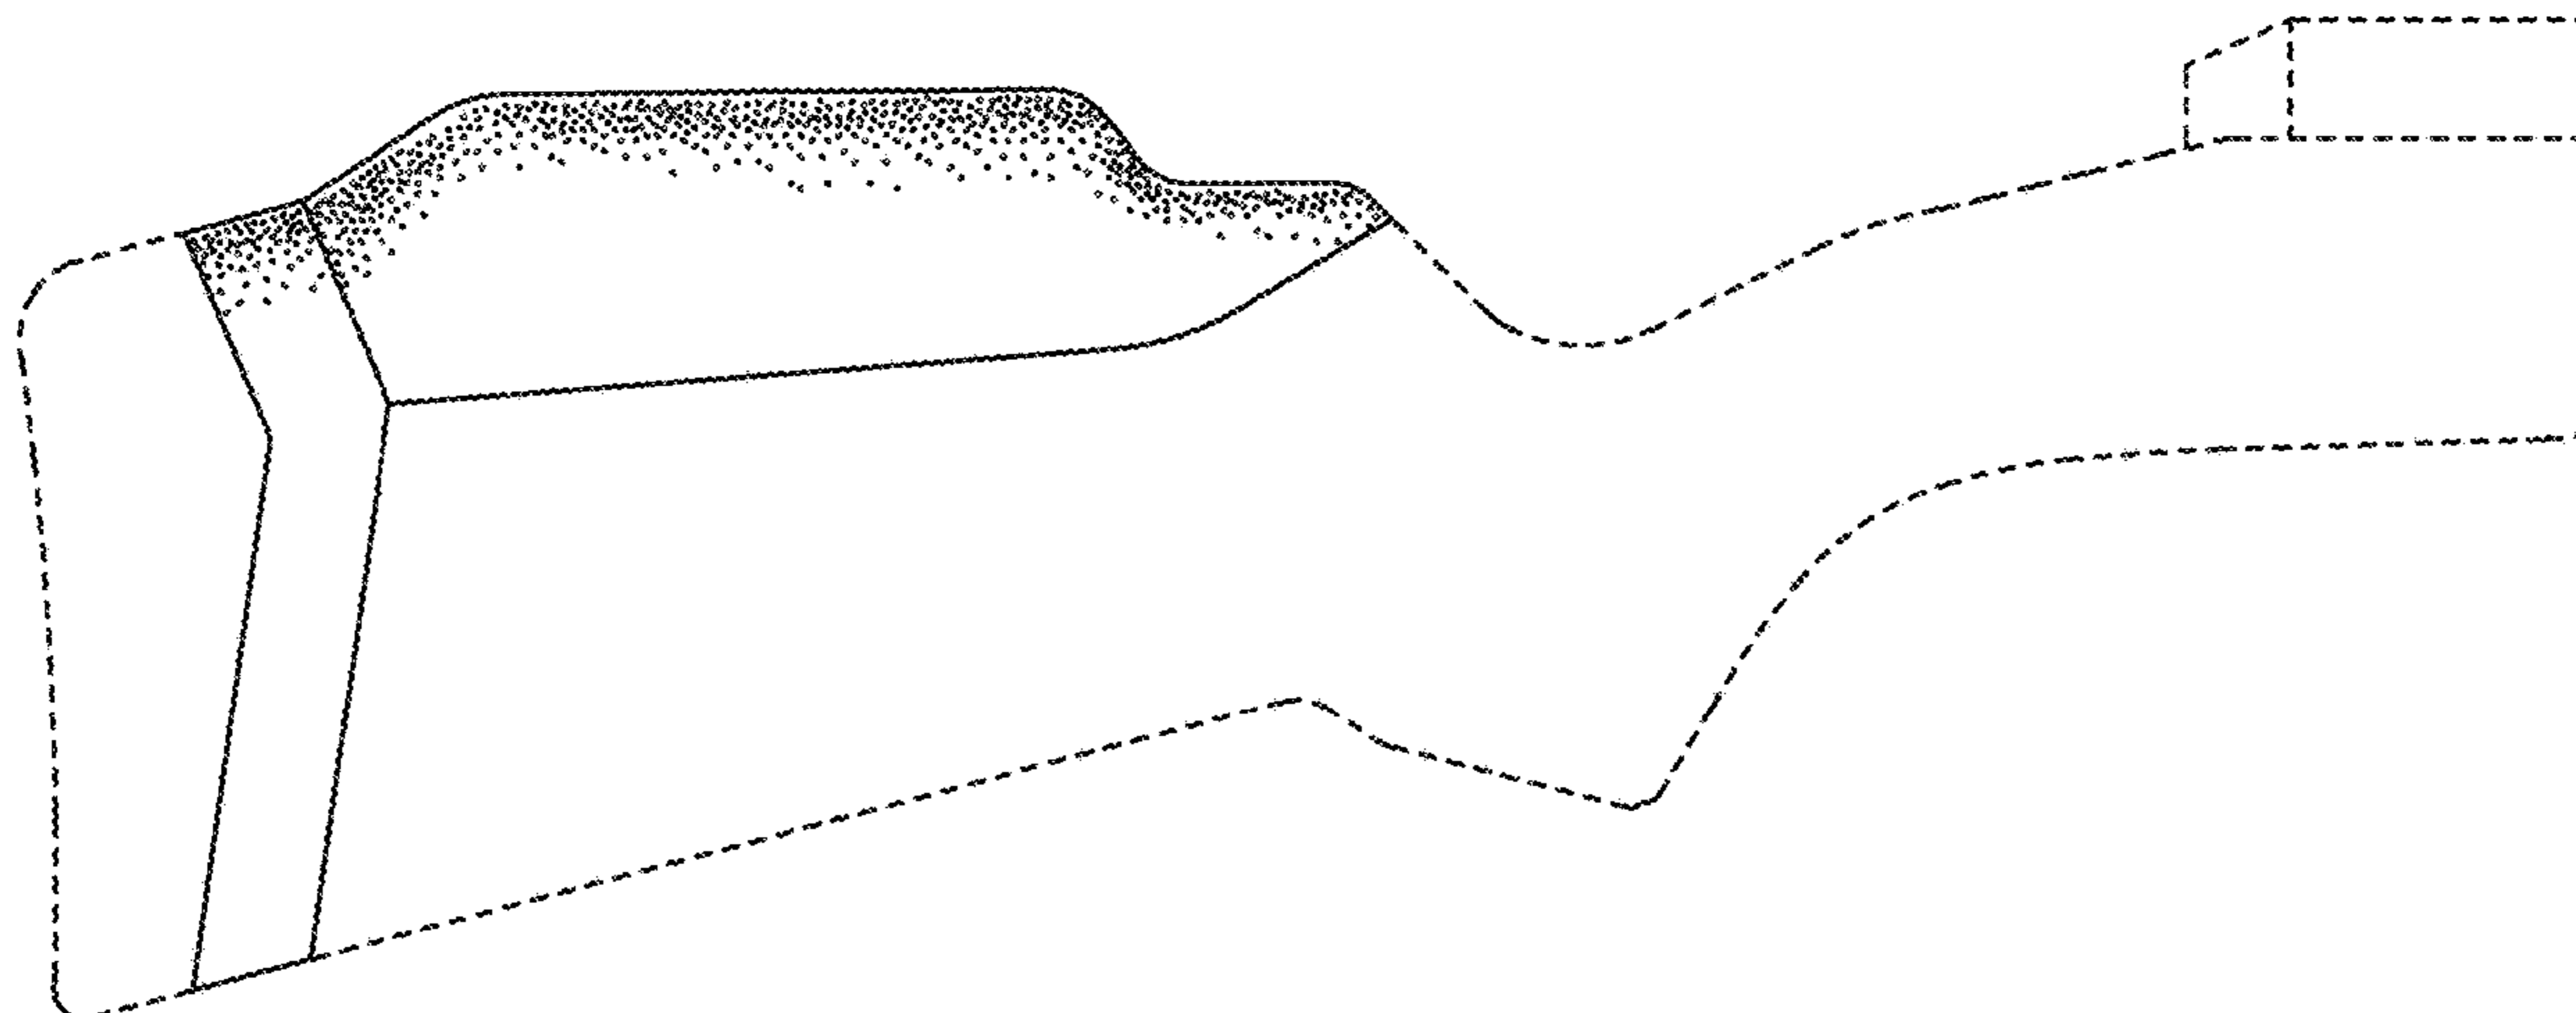

FIG. 23 is a right side view of the firearm stock portion.
 FIG. 24 is a left side view of the firearm stock portion.
 FIG. 25 is a right side view of the firearm stock portion.
 FIG. 26 is a left side view of the firearm stock portion.
 FIG. 27 is a right side view of the firearm stock portion.
 FIG. 28 is a left side view of the firearm stock portion.
 FIG. 29 is a right side view of the firearm stock portion.
 FIG. 30 is a left side view of the firearm stock portion.
 FIG. 31 is a right side view of a firearm stock portion showing the new design.
 FIG. 32 is a left side view of the firearm stock portion.
 FIG. 33 is a right side view of the firearm stock portion.
 FIG. 34 is a left side view of the firearm stock portion.
 FIG. 35 is a right side view of the firearm stock portion.
 FIG. 36 is a left side view of the firearm stock portion.
 FIG. 37 is a right side view of the firearm stock portion.
 FIG. 38 is a left side view of the firearm stock portion.
 FIG. 39 is a right side view of the firearm stock portion.
 FIG. 40 is a left side view of the firearm stock portion.
 FIG. 41 is a right side view of a firearm stock portion showing the new design.
 FIG. 42 is a left side view of the firearm stock portion.
 FIG. 43 is a right side view of the firearm stock portion.
 FIG. 44 is a left side view of the firearm stock portion.
 FIG. 45 is a right side view of the firearm stock portion.
 FIG. 46 is a left side view of the firearm stock portion.
 FIG. 47 is a right side view of the firearm stock portion.
 FIG. 48 is a left side view of the firearm stock portion.
 FIG. 49 is a right side view of the firearm stock portion; and,
 FIG. 50 is a left side view of the firearm stock portion.
 The top view is not shown and is not claimed.
 The bottom view is not shown and is not claimed.
 The front view is not shown and is not claimed.
 The rear view is not shown and is not claimed.
 Broken lines shown in the drawings illustrate structure or features which form no part of the claimed design.
 The firearm stock portion may include various combinations of length adjustment spacers, each length adjustment spacer having a different overall thickness.
 We understand that the embodiments of our inventions includes features and components illustrated by the drawings herein and shown in the applications incorporated by reference, in all permutations and combinations of such components and features. In other words, we understand embodiments our inventions includes the discrete components illustrated by the drawings herein and the applications incorporated by reference, with or without specific features in the various drawings claimed. We understand embodiments of our inventions includes different combinations of such discrete components as illustrated by the drawings herein and in the applications incorporated by reference. Whereby we reserve the right and contemplate making solid lines dashed for any specific feature or component, part, or portion in the various embodiments illustrated herein and in the drawings of the applications incorporated by reference herein as we have contemplated such as being embodiments of our invention, and we reserve the right and contemplate

making dashed lines solid for any specific feature or component, part, or portion.

1 Claim, 50 Drawing Sheets

Related U.S. Application Data

a continuation-in-part of application No. 15/952,664, filed on Apr. 13, 2018, now Pat. No. 10,739,106.
