(57) **CLAIM**

The ornamental design for a window frame lineal receptor cap, as shown and described.

DESCRIPTION

The present application is related to U.S. design application Ser. No. 35/001,317, filed Jan. 20, 2017, which is a national application of International (Hague) design patent application DEN/2131301/JB, now International Registration No. DM/095397, and four U.S. design patent divisional applications of U.S. national application Ser. No. 35/001317, namely, application Ser. Nos. 29/665,655, 29/665,646, 29/665,643 and 29/665,640, each filed Oct. 5, 2018.

FIG. **1** is an upper left side perspective view of the window frame lineal receptor cap, according to the present design.

FIG. **2** is a front view thereof; the back view is a mirror image of the front view.

FIG. **3** is a right side view thereof.

FIG. **4** is a left side view thereof.

FIG. **5** is a bottom view thereof; and,

FIG. **6** is a top view thereof.

The broken lines in the drawings illustrate environmental subject matter only and form no part of the claimed design.

The window frame lineal receptor cap is shown with a symbolic break in its length. The appearance of any portion of the window frame lineal receptor cap between the break lines forms no part of the claimed design.

1 Claim, 4 Drawing Sheets
