(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

The FIGURE is a front view of a display screen with graphical user interface showing our new design. The even length broken lines depict portions of the display screen with graphical user interface in which the design is embodied that are not considered part of the claimed design. The alternating long and short dashed lines show a boundary between the claimed design and unclaimed portions.
