(57) **CLAIM**

The ornamental design for a roof mount attachment for mounting solar panels, as shown and described.

DESCRIPTION

FIG. 1 is a top, front, and left side isometric view of a first embodiment of the roof mount attachment for mounting solar panels showing my new design;

FIG. 2 is a top, rear, and left side isometric of the first embodiment;

FIG. 3 is a bottom, front, and left side isometric view of the first embodiment;

FIG. 4 is a front elevation view of the first embodiment;

FIG. 5 is a rear elevation view of the first embodiment;

FIG. 6 is a left side elevation view of the first embodiment;

FIG. 7 is a right side elevation view of the first embodiment;

FIG. 8 is a top plan view of the first embodiment;

FIG. 9 is a bottom plan view of the first embodiment.

FIG. 10 is a top, front, and left side isometric view of a second embodiment of the roof mount attachment for mounting solar panels showing my new design;

FIG. 11 is a top, rear, and left side isometric of the second embodiment;

FIG. 12 is a bottom, front, and left side isometric view of the second embodiment;

FIG. 13 is a front elevation view of the second embodiment;

FIG. 14 is a rear elevation view of the second embodiment;

FIG. 15 is a left side elevation view of the second embodiment;

FIG. 16 is a right side elevation view of the second embodiment;

FIG. 17 is a top plan view of the second embodiment; and,

FIG. 18 is a bottom plan view of the second embodiment.

The surface shading illustrated in the drawings depicts surface contour and does not depict or otherwise suggest the presence of surface ornamentation or texture. In FIGS. 1-9, portions are shown broken away to indicate that those portions have no specific length. The evenly-spaced broken
