(57) **CLAIM**

The ornamental design for "touchpad display screen for computing device," as shown and described in FIGS. **1-13**.

DESCRIPTION

FIG. **1** is a right, front perspective view of a touchpad display screen for a computing device, showing our new design in an open position for use;
FIG. **2** is a front view thereof;
FIG. **3** is a top view thereof;
FIG. **4** is a right, front perspective view of the touchpad display screen of FIG. **1**, shown in a closed position for use;
FIG. **5** is a front view thereof;
FIG. **6** is a top view thereof;
FIG. **7** is another right, front perspective view of the touchpad display screen of FIG. **1**, showing the touchpad display screen in a display mode;
FIG. **8** is a front view thereof;
FIG. **9** is a top view thereof;
FIG. **10** is a right, front perspective view of the touchpad display screen of FIG. **1**, shown in a closed position for use with the touchpad display screen in a display mode.
FIG. **11** is a front view thereof;
FIG. **12** is a top view thereof; and,
FIG. **13** is another right, front perspective view of the touchpad display screen of FIG. **1**, showing the touchpad display screen in an alternate display mode.
The broken lines showing the graphical features of the display modes on the touchpad display screen from no part of the claimed design, while all other broken lines depict environmental computing device structure that forms no part of the claim.
