#### (57) CLAIM

The ornamental design for a display panel or portion thereof with a transitional mixed reality graphical user interface, as shown and described.

#### DESCRIPTION

FIG. 1 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a first image in a sequence of a first design;

FIG. 2 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a second image in the sequence of the first design;

FIG. 3 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a third image in the sequence of the first design;

FIG. 4 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a fourth image in the sequence of the first design;

FIG. 5 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a fifth image in the sequence of the first design;

FIG. 6 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a first image in a sequence of a second design;

FIG. 7 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a second image in the sequence of the second design;

FIG. 8 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a third image in the sequence of the second design;

FIG. 9 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a fourth image in the sequence of the second design;

FIG. 10 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a first image in a sequence of a third design;

FIG. 11 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a second image in the sequence of the third design;

FIG. 12 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a third image in the sequence of the third design;

FIG. 13 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a fourth image in the sequence of the third design;

FIG. 14 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a first image in a sequence of a fourth design;

FIG. 15 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a second image in the sequence of the fourth design;

FIG. 16 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a third image in the sequence of the fourth design;

FIG. 17 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a fourth image in the sequence of the fourth design;

FIG. 18 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a first image in a sequence of a fifth design;

FIG. 19 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a second image in the sequence of the fifth design;

FIG. 20 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a third image in the sequence of the fifth design;

FIG. 21 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a fourth image in the sequence of the fifth design;

FIG. 22 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a first image in a sequence of a sixth design;

FIG. 23 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a second image in the sequence of the sixth design;

FIG. 24 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a third image in the sequence of the sixth design;

FIG. 25 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a fourth image in the sequence of the sixth design;

FIG. 26 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a first image in a sequence of a seventh design;

FIG. 27 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a second image in the sequence of the seventh design;

FIG. 28 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a third image in the sequence of the seventh design;

and,

FIG. 29 is a front view of a display panel or portion thereof with a transitional mixed reality graphical user interface showing a fourth image in the sequence of the seventh design.

The appearance of the image in each embodiment sequentially transitions between the images shown in FIGS. 1 through 5, FIGS. 6 through 9, FIGS. 10 through 13, FIGS. 14 through 17, FIGS. 18 through 21, FIGS. 22 through 25

and FIGS. 26 through 29, respectively. The process or period in which one image transitions into another forms no part of the claimed design.

The outermost broken line rectangle illustrates a display panel or portion thereof that forms no part of the claimed design. The remaining broken lines illustrate a mixed reality environment and form no part of the claimed design.
