CLAIM

The ornamental design for a component for a drug delivery device, as shown and described.

DESCRIPTION

The file of this patent contains at least one computer-generated image executed in color. Copies of this patent with computer-generated images will be provided by the Office upon request and payment of the necessary fee.

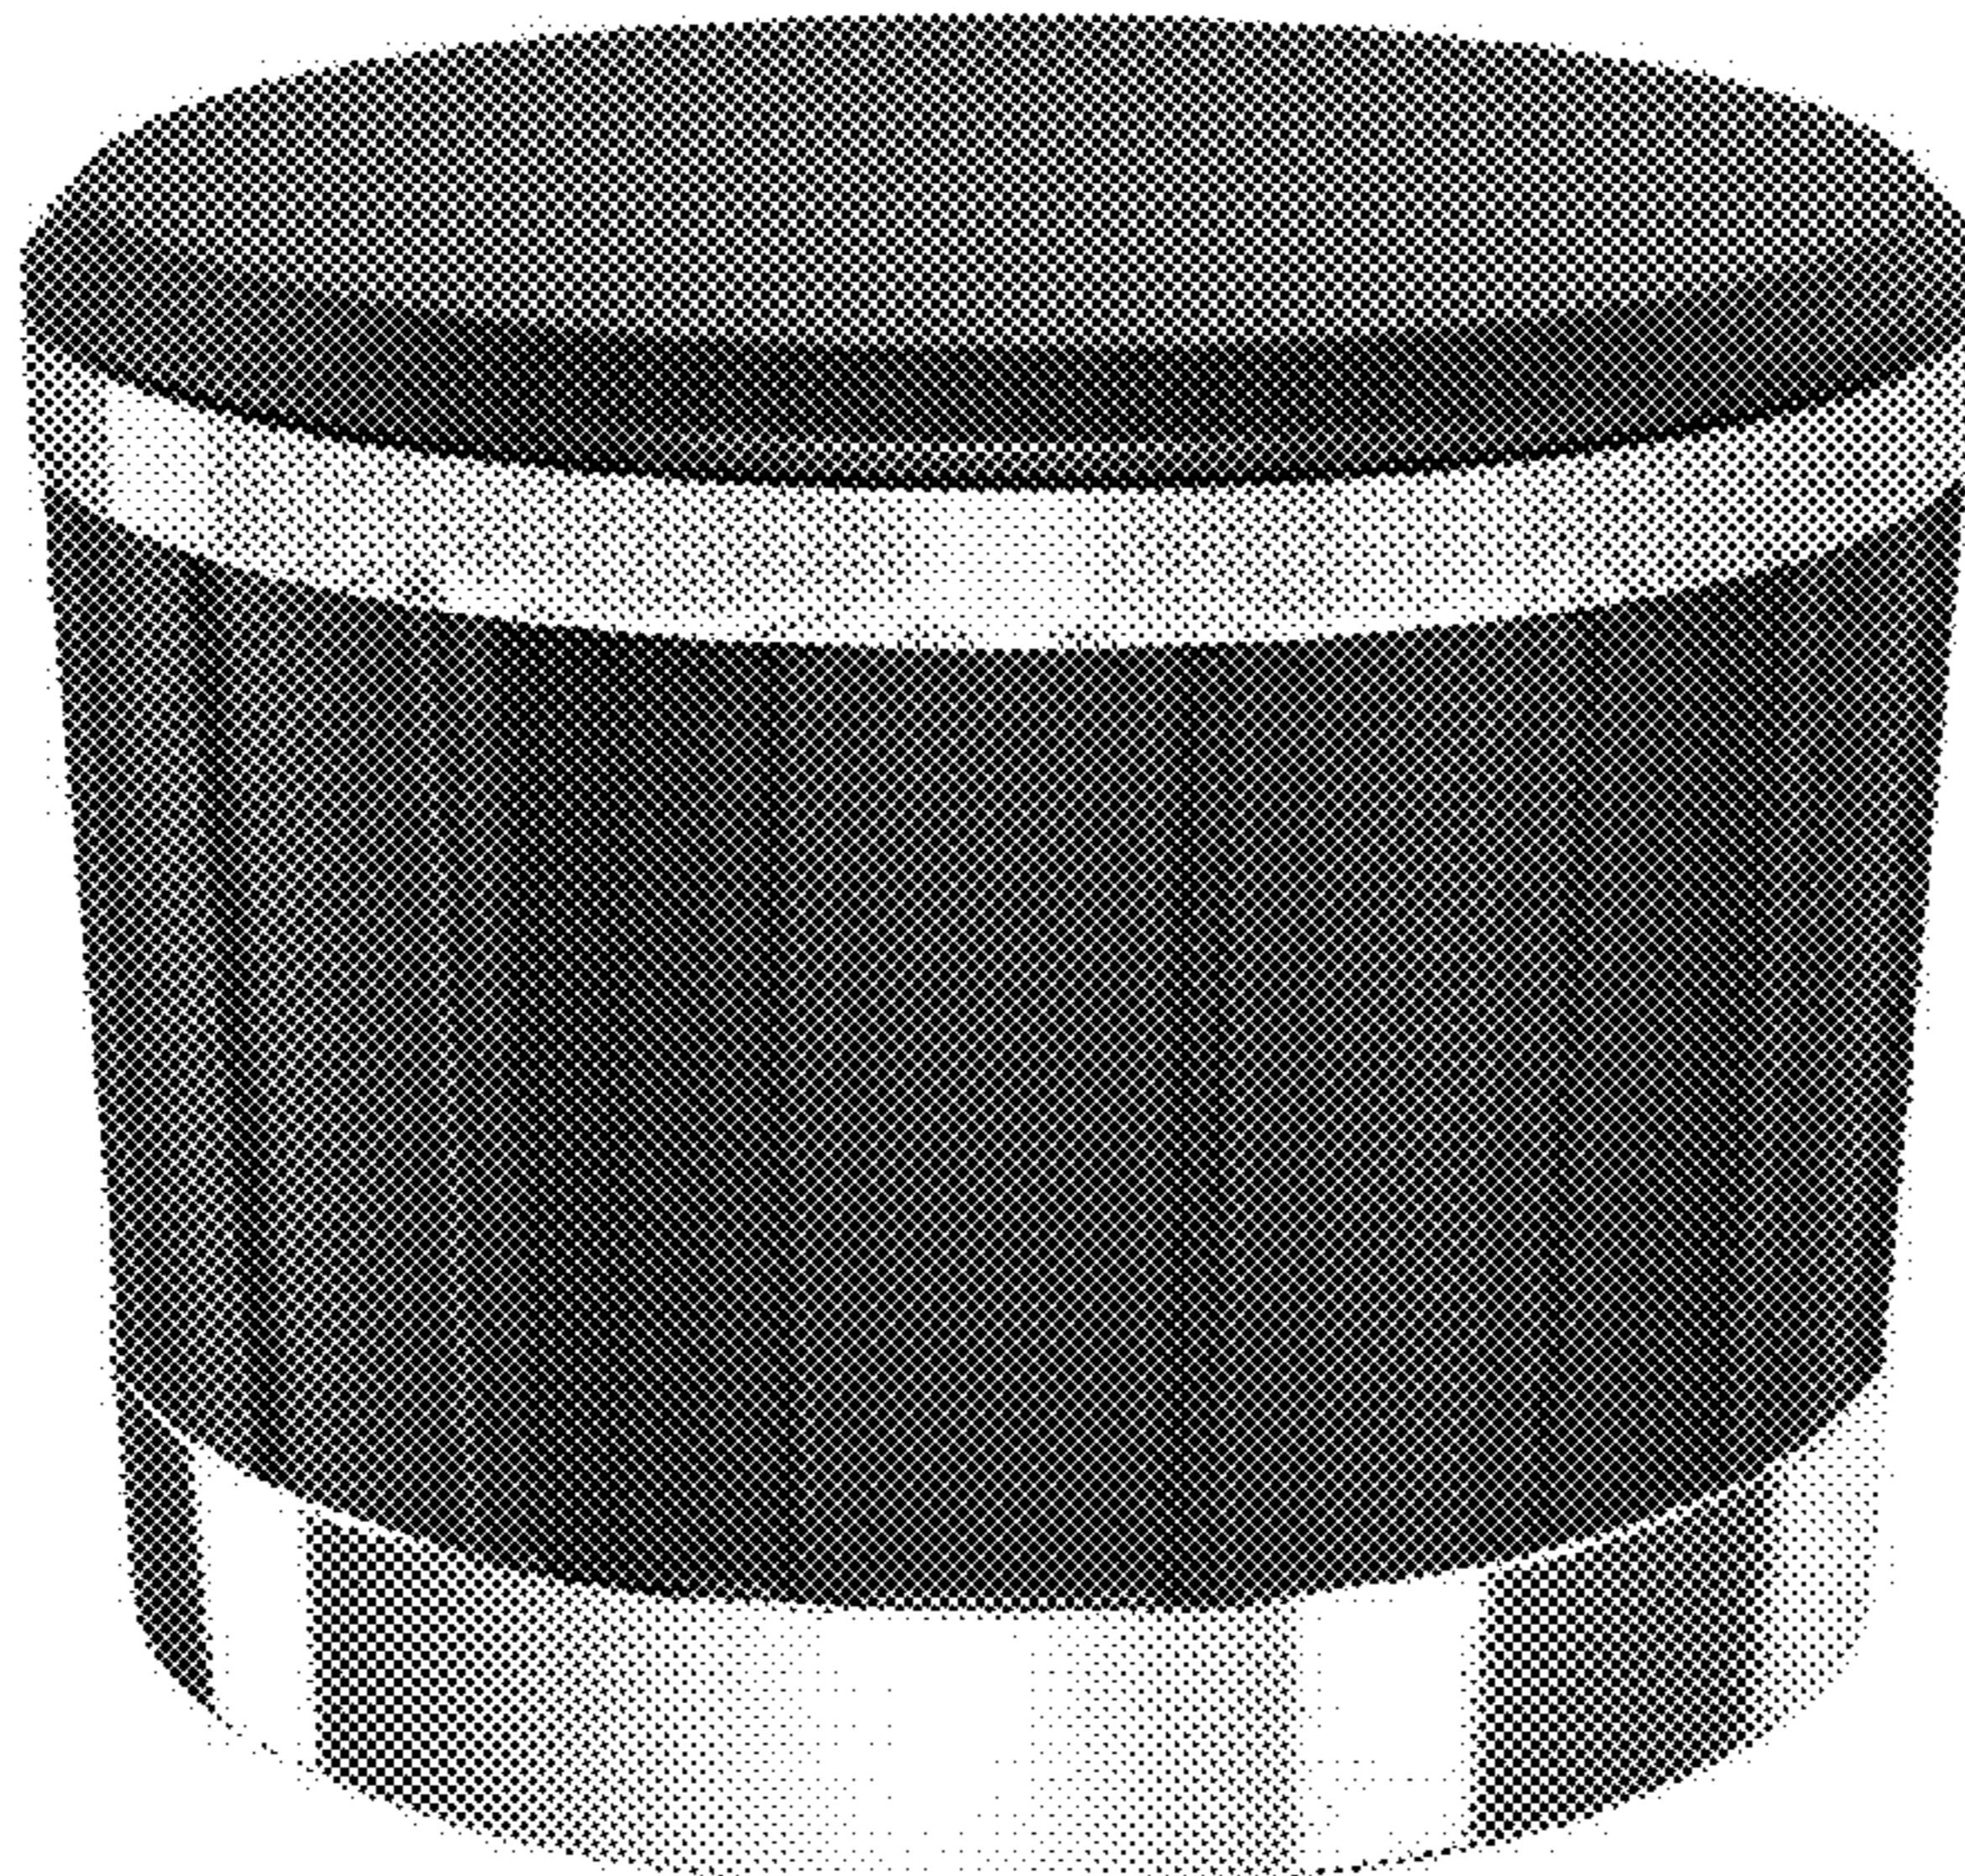

FIG. 1 is a front, top perspective view of a component for a drug delivery device, showing the new design; FIG. 2 is a front elevation view thereof, wherein the rear elevation view, the left side view, and the right side view are identical thereto;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof; and,

FIG. 5 is a second top, perspective view thereof.

The broken lines of uneven length in FIG. 4 define the boundary of the claimed design and form no part of the claimed design. The area of lighter contrast within the broken lines of uneven length form no part of the claimed design.
