(57) **CLAIM**

The ornamental design for a foldable mobile phone with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first embodiment of a foldable mobile phone with transitional graphical user interface, showing our new design with the transitional graphical user interface displayed on an inner display screen of the foldable mobile phone in a fully open state;

FIG. 2 is a rear view thereof;

FIG. 3 is a front view of a second image in a sequence of the first embodiment of a foldable mobile phone with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an outer display screen of the foldable mobile phone in a folded state;

FIG. 4 is a rear view thereof;

FIG. 5 is a front view of a second embodiment of a foldable mobile phone with transitional graphical user interface, showing our new with the transitional graphical user interface displayed on an inner display screen of the foldable mobile phone in a fully open state;

FIG. 6 is a rear view thereof;

FIG. 7 is a front view of a second image in a sequence of the second embodiment of a foldable mobile phone with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an outer display screen of the foldable mobile phone in a folded state; and,

FIG. 8 is a rear view thereof.

The appearance of the transitional graphical user interface sequentially transitions between the images shown in FIGS. 1 and 3 and FIGS. 5 and 7, respectively. The process or period in which one image transitions to another forms no part of the claimed design.

The broken lines shown in the drawings depict portions of the foldable mobile phone with transitional graphical user interface that form no part of the claimed design.

1 Claim, 8 Drawing Sheets
