FIG. 4 is a front view thereof showing a fourth image in the sequence.

FIG. 5 is a front view thereof showing a fifth image in the sequence.

FIG. 6 is another view of FIG. 1 but shown without the broken lines illustrating portions of the graphical user interface, for clarity of illustrating the claimed design.

FIG. 7 is another view of FIG. 2 but shown without the broken lines illustrating portions of the graphical user interface, for clarity of illustrating the claimed design.

FIG. 8 is another view of FIG. 3 but shown without the broken lines illustrating portions of the graphical user interface, for clarity of illustrating the claimed design.

FIG. 9 is another view of FIG. 4 but shown without the broken lines illustrating portions of the graphical user interface, for clarity of illustrating the claimed design; and,

(Continued)

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-5. The process or period in which one image transitions to another image forms no part of the claimed design.

In the drawing figures, the two outermost broken line rectangles illustrate the edges of the display screen. For clarity, the outermost broken line rectangles representing the edges of the display screen are also shown in FIGS. 6-10. All other broken lines illustrate portions of the graphical user interface. None of the broken lines form part of the claimed design.
