(57) **CLAIM**

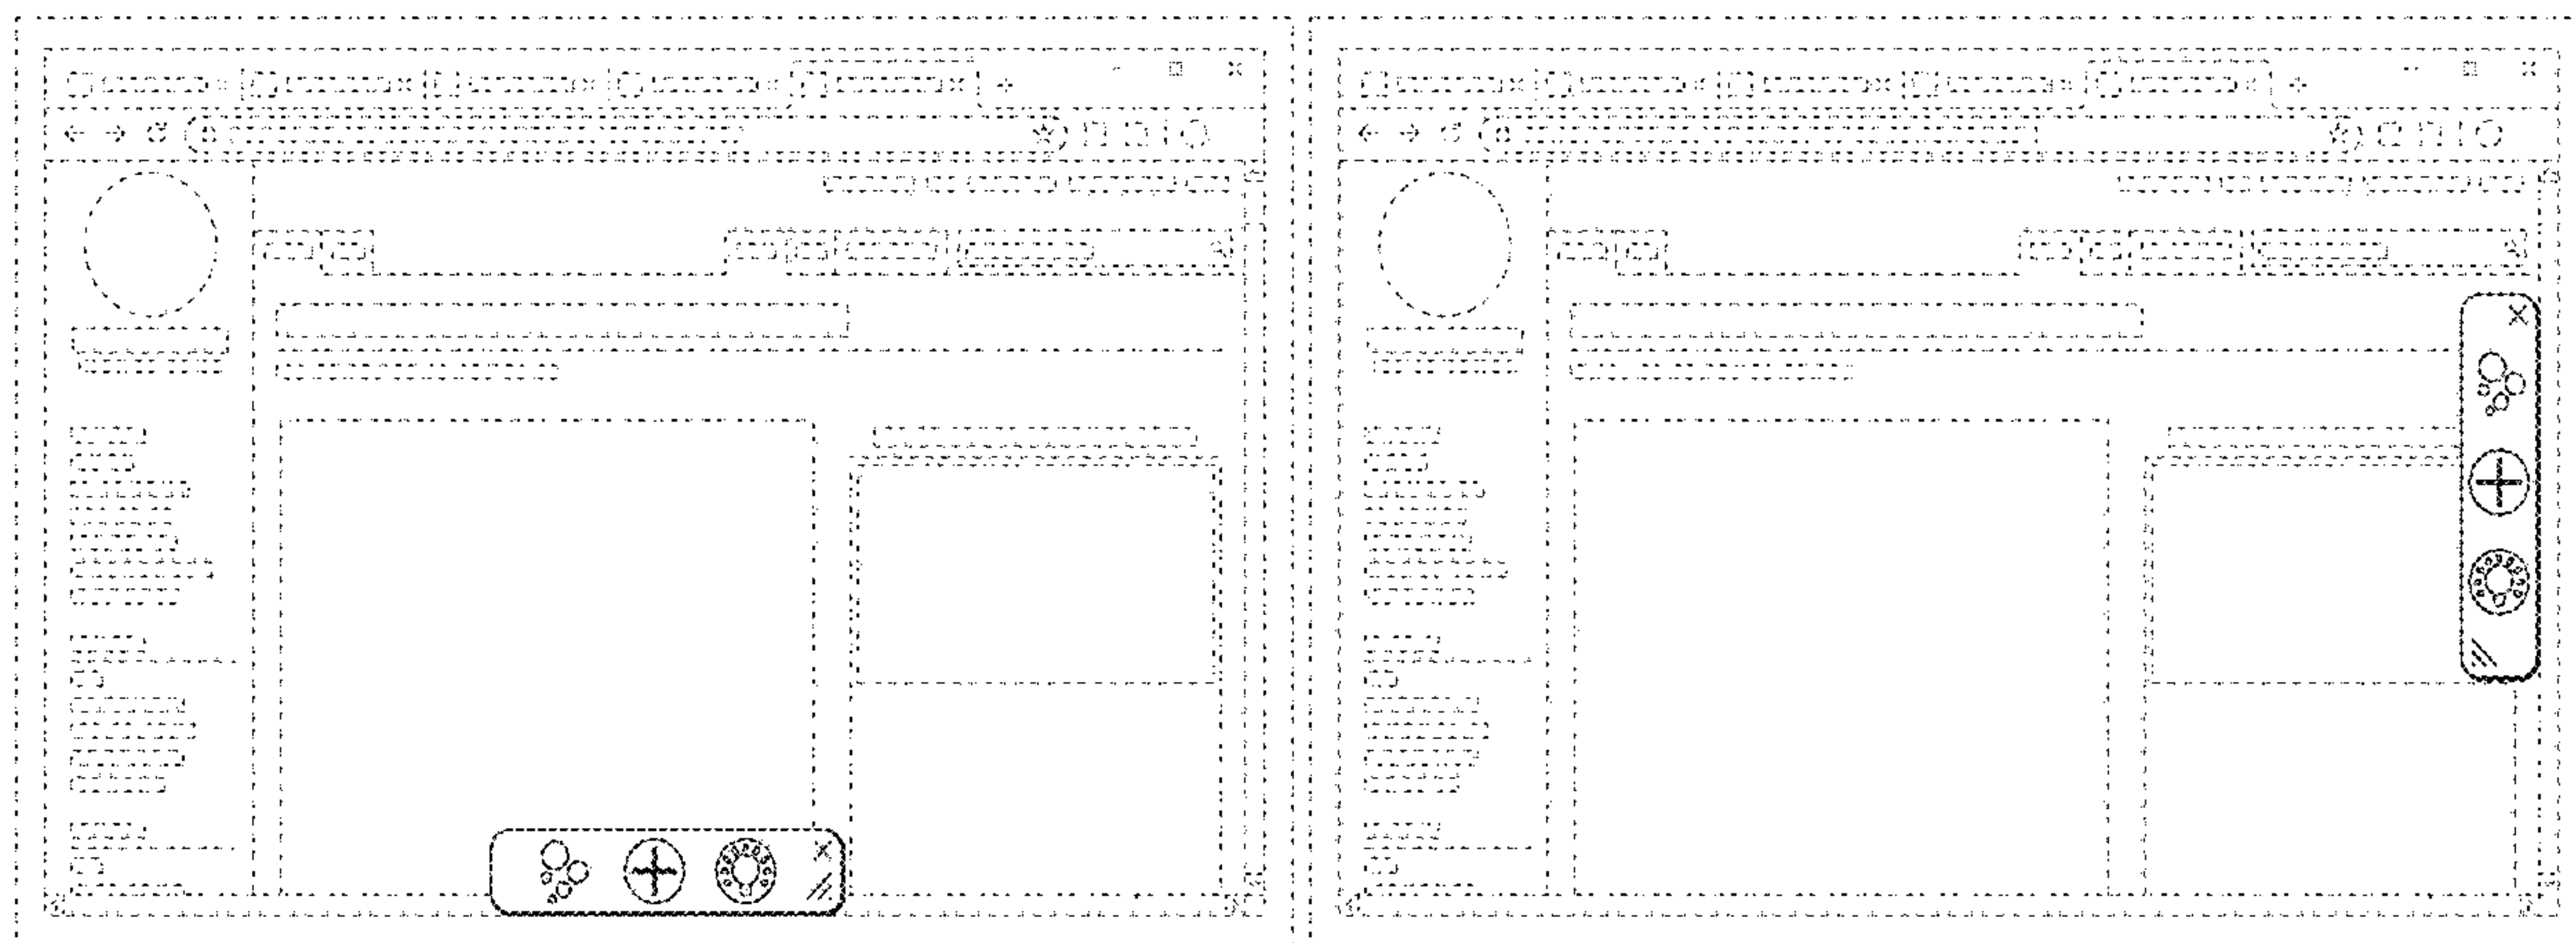

The ornamental design for a display screen with graphical user interface showing a nanobar element, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the display screen with graphical user interface showing a nanobar element with the nanobar element shown along the bottom edge of the display screen; FIG. 2 is a second embodiment thereof showing the nanobar element rotated and positioned along the right edge of the display screen; and, FIG. 3 is a third embodiment thereof showing the nanobar element rotated and positioned along the left edge of the display screen.

Broken lines represent unclaimed portions of the graphical user interface and display screen and form no part of the claimed design. The outermost broken lines in the figures show the display screen, or portion thereof, and form no part of the claimed design.
