(57) **CLAIM**

The ornamental design for a display screen portion with transitional icon, as shown and described.

DESCRIPTION

The present application is also related to U.S. Design patent application Ser. No. 29/623,813, entitled Status Layer Graphical Interface; U.S. Design patent application Ser. No. 29/623,815, entitled Road Element Icon; U.S. Design patent application Ser. No. 29/623,820, entitled Road Element Icon, U.S. Design patent application Ser. No. 29/623,826, entitled Graphical Interface Icon; and U.S. Design patent application Ser. No. 29/623,833, entitled Pull Over or Turning Graphical Interface, each filed on Oct. 27, 2017, the entire disclosures of which are incorporated herein by reference.

FIG. 1 is a front view of a first image of a display screen portion with transitional icon according to the first and second embodiments of the design;

FIG. 2 is a second image thereof;

FIG. 3 is a third image thereof;

FIG. 4 is a fourth image thereof;

FIG. 5 is a fifth image thereof;

FIG. 6 is a sixth image of the first embodiment;

FIG. 7 is a front view of a first image of a display screen portion with transitional icon according to the third and fourth embodiments of the design;

FIG. 8 is a second image thereof;

FIG. 9 is a third image thereof;

FIG. 10 is a fourth image thereof;

FIG. 11 is a fifth image thereof; and,

FIG. 12 is a sixth image of the third embodiment.

The dash-dot lines indicate a boundary or perimeter of the display screen portion with transitional icon and form no part of the claimed design. In the figures, the perimeters of the portion of the underlying display screen and the graphical interface are understood to be flush.

The portions shown in a pattern or patterns of stipple illustrate areas of contrasting appearance.

The appearance of the image of the first embodiment sequentially transitions between FIGS. 1-6. The appearance

(Continued)

of the image of the second embodiment transitions sequentially between FIGS. 1-5. The appearance of the image of the third embodiment sequentially transitions between FIGS. 7-12. The appearance of the image of the fourth embodiment transitions sequentially between FIGS. 7-11. The process or period in which one image transitions to another image forms no part of the claimed design.
