(57) **CLAIM**

The ornamental design for a display screen with an animated graphical user interface having a transitional flower design icon, as shown and described.

DESCRIPTION

FIG. **1** shows a first view of an embodiment of a display screen with an animated graphical user interface having a transitional flower design icon which embodies my design wherein a first image is shown on the display screen;

FIG. **2** shows a second, sequential, view the embodiment of the display screen with an animated graphical user interface having a transitional flower design icon, wherein a second image is shown on the display screen and, in accordance with the embodiment, the first image transitions sequentially to the second image;

FIG. **3** shows a third, sequential, view of the embodiment of the display screen with an animated graphical user interface having a transitional flower design icon, wherein a third image is shown on the display screen and, in accordance with the embodiment, the second image transitions sequentially to the third image;

FIG. **4** shows a fourth, sequential, view of the embodiment of the display screen with an animated graphical user interface having a transitional flower design icon, wherein a fourth image is shown on the display screen and, in accordance with the embodiment, the third image transitions sequentially to the fourth image;

FIG. **5** shows a fifth, sequential, view of the embodiment of the display screen with an animated graphical user interface having a transitional flower design icon, wherein a fifth image is shown on the display screen and, in accordance with the embodiment, the fourth image transitions sequentially to the fifth image;

FIG. **6** shows a sixth, sequential, view of the embodiment of the display screen with an animated graphical user interface having a transitional flower design icon, wherein a sixth

(Continued)

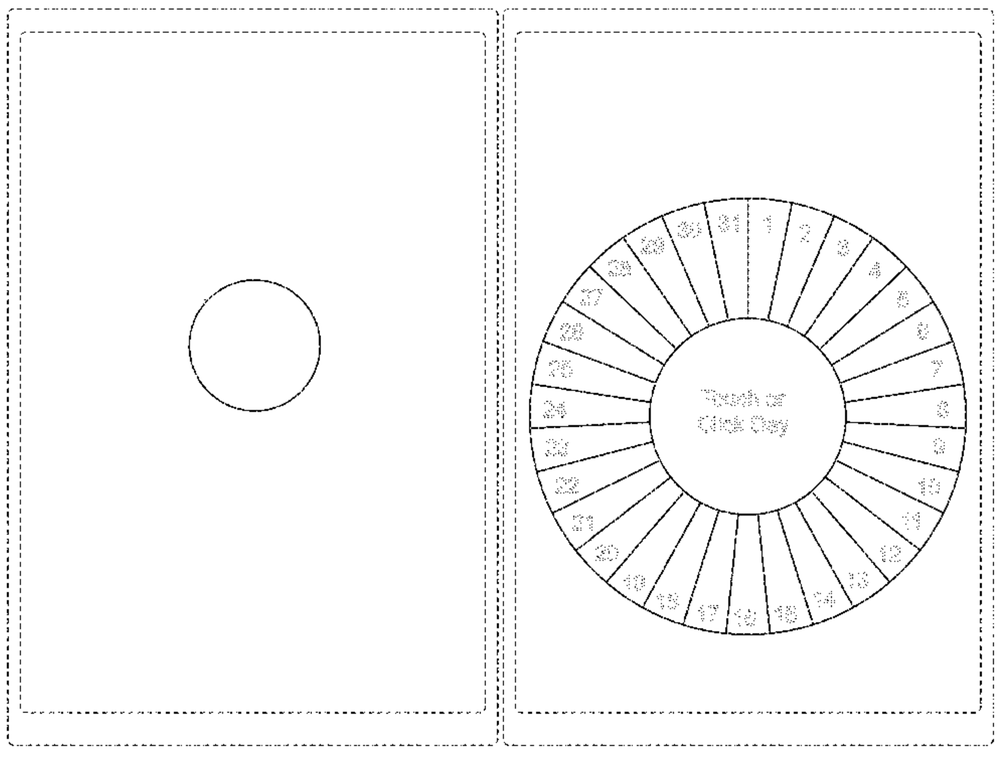

image is shown on the display screen and, in accordance with the embodiment, the fifth image transitions sequentially to the sixth image; and,

FIG. **7** shows a seventh, sequential, view of the embodiment of the display screen with an animated graphical user interface having a transitional flower design icon, wherein a seventh image is shown on the display screen and, in accordance with the embodiment, the sixth image transitions sequentially to the seventh image.

The broken line showing of a display screen with graphical user interface is included for the purpose of showing portions of the article which form no part of the claim.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. **1-7**. The process or period in which one image transitions to another image forms no part of the claimed design.
