(57) **CLAIM**

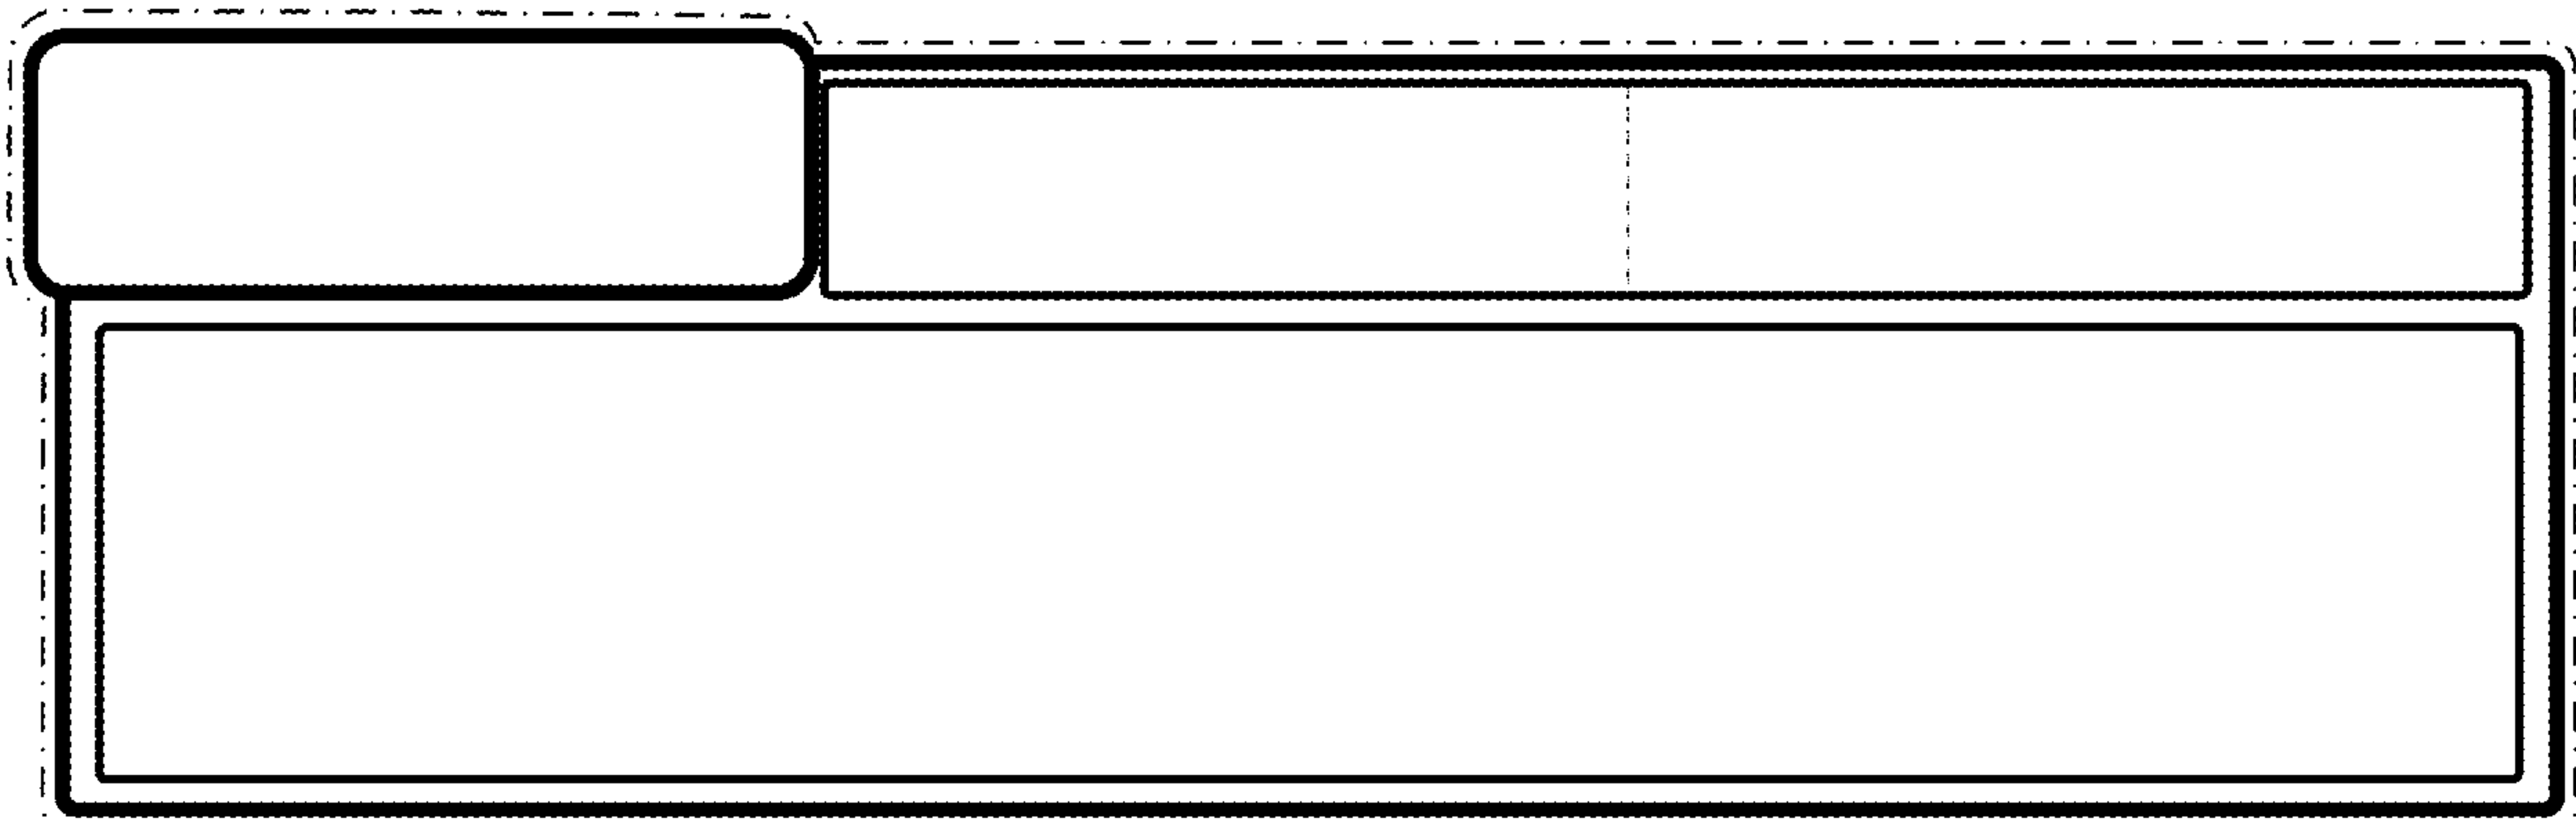

The ornamental design for a display screen with graphical user interface for patient central monitoring station, as shown and described.

DESCRIPTION

The FIGURE is a front view of a display screen with graphical user interface for patient central monitoring station.

The dot-dash broken lines in the Figure show a portion of a display screen that defines a boundary of, but not included in, the claimed design. The evenly spaced broken lines illustrate portions of the graphical user interface that form no part of the claimed design.
