(57) **CLAIM**

The ornamental design for a display screen or portion thereof with a graphical user interface, as shown and described.

**DESCRIPTION**

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIGS. 1A-1C are enlarged partial front views of a display screen or portion thereof with a graphical user interface as shown in its entirety in FIG. 2.

FIG. 2 is a front view of the display screen or portion thereof with a graphical user interface, where enlarged partial views thereof being shown in FIGS. 1A-1C; and, FIG. 3 illustrates an enlarged front view of a graphical element as illustrated in FIGS. 1C and 2.

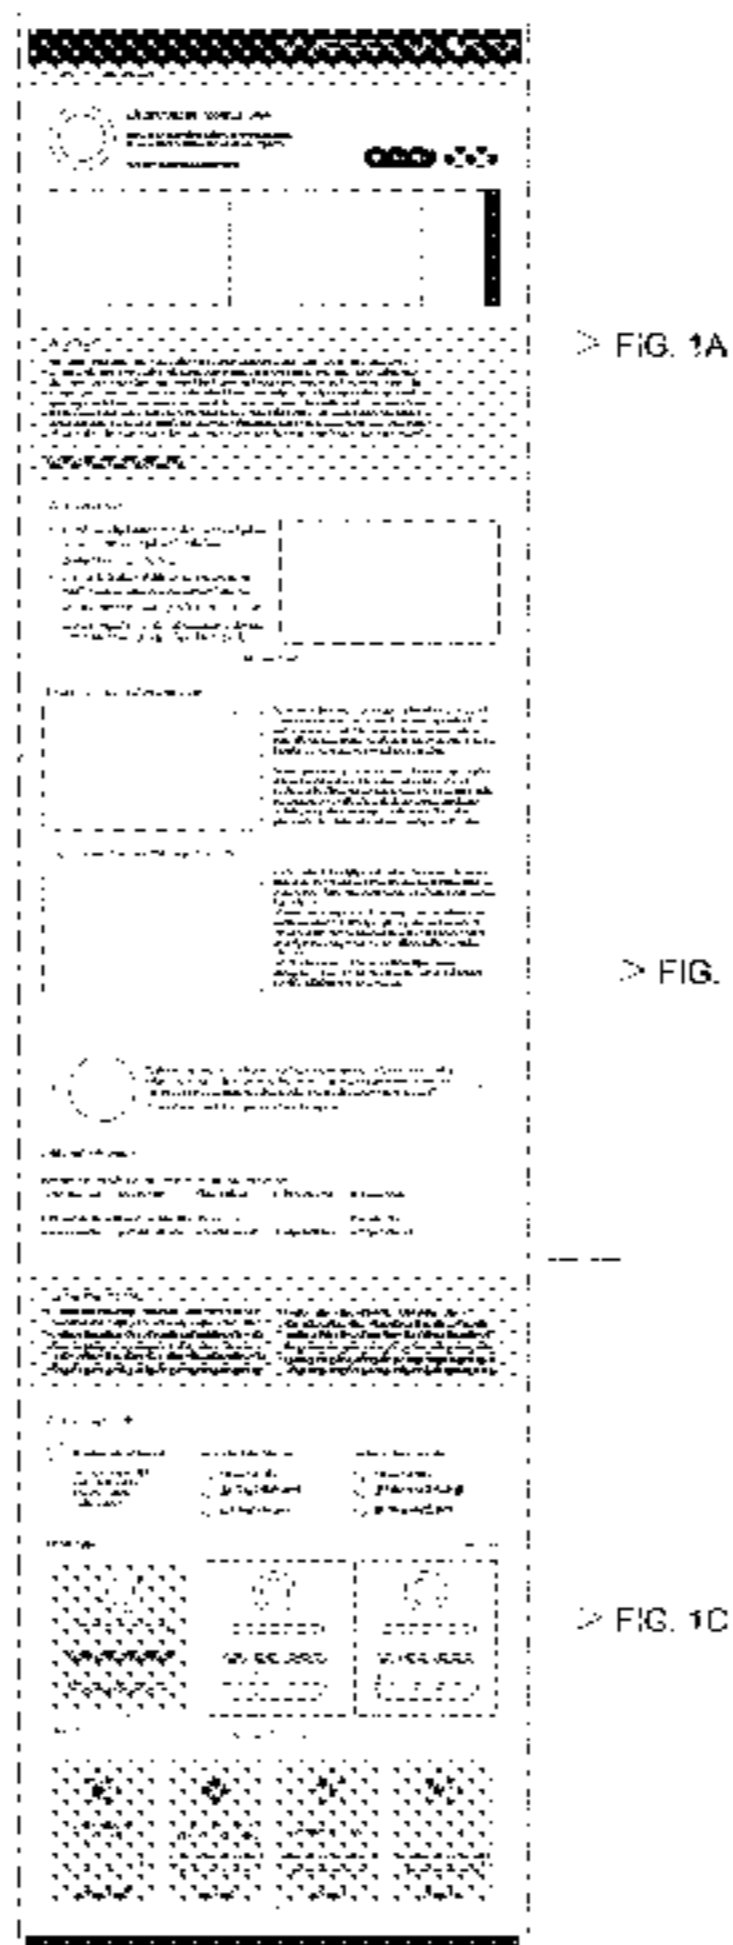

In the Figures, the broken lines including alternating long and short dashes forming a frame around the graphical user interface or graphical element are for the purpose of illustrating a display screen or a portion thereof that forms no part of the claimed design.

In FIGS. 1A-1C, the broken, jagged lines including alternating three long dashes and one short dash are for the purpose of illustrating a page break between FIGS. 1A and 1B, and between FIGS. 1B and 1C.

In FIGS. 1C and 3, the broken lines including alternating two long dashes and two short dash are for the purpose of identifying the portion of FIG. 1C that is shown in the corresponding enlarged view illustrated in FIG. 3.

The other broken lines within the graphical user interface or within the graphical elements represent portions of the graphical user interface or graphical elements that form no part of the claimed design. These unclaimed portions include unclaimed text formed in broken line as explained below: FIG. 1A: the broken-line text found within the broken-line circle in the black-colored banner at the top of the graphical user interface, the broken-line text found within the gray banner located below the black-colored banner, the broken-line text to the right of the broken-line concentric circle

(Continued)

element, the broken-line text below the “What is it?” heading, the broken-line text within the turquoise-colored elements, and the broken-line text below the “What does it do?” heading and listed to the right of the orange-colored bullet points;

FIG. 1B: the broken-line text to the right of and above the first broken-line rectangular element, the broken-line text to the right of and above the second broken-line rectangular element, the broken-line text to the right of the first broken-line circular element, and the broken-line text below the “Additional information” heading;

FIG. 1C: the broken-line text found below the “System requirements” heading and within the gray rectangular section, and the broken-line text below the “About the app provider” heading and above the “Other Apps” heading; and FIG. 3: all of the text illustrated therein is shown as broken-line text.

# FIG. 1B

FIG. 1B is a schematic diagram of a device, enclosed in a dashed rectangular border with decorative zig-zag breaks at the top and bottom. The diagram is divided into several sections:

- Top Section:** A dashed rectangular box on the left is empty. To its right is a column of text in a non-English script.
- Middle Section:** A dashed rectangular box on the left is empty. To its right is another column of text in the same non-English script.
- Bottom Section:** A dashed circle is positioned on the left. To its right is a column of text in the same non-English script. The circle is flanked by two small arrows pointing outwards.
- Bottom-most Section:** A section titled "Additional information" containing a table with five columns and two rows of text.

The text in the non-English script is illegible due to the image quality and appears to be bleed-through from the reverse side of the page.
