(57) **CLAIM**

The ornamental design for a viewfinder display screen for digital camera with graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a rear perspective view of a digital camera provided with a viewfinder display screen for digital camera with graphical user interface, showing the new design.

FIG. 2 is a front view of the digital camera.

FIG. 3 is a rear view thereof.

FIG. 4 is a top view thereof.

FIG. 5 is a left side view thereof.

FIG. 6 is an enlarged view of a rectangle lying at the intersection of the horizontal and vertical lines marked **6, 8, 9** in FIG. 3, showing a first image of the viewfinder display screen for digital camera with graphical user interface.

FIG. 7 is an enlarged view of a square lying at the intersection of the horizontal and vertical lines marked **7** in FIG. 6.

FIG. 8 is an enlarged view of the rectangle lying at the intersection of the horizontal and vertical lines marked **6, 8, 9** in FIG. 3, showing a second image of the viewfinder display screen for digital camera with graphical user interface; and,

FIG. 9 is an enlarged view of the rectangle lying at the intersection of the horizontal and vertical lines marked **6, 8, 9** in FIG. 3, showing a third image of the viewfinder display screen for digital camera with graphical user interface.

The broken lines showing the digital camera provided with the viewfinder display screen for digital camera with graphical user interface illustrate the environment of the claimed design and form no part thereof. The broken lines within the

(Continued)

viewfinder display screen in the drawings illustrate portions of the graphical user interface which form no part of the claimed design.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
