(57) **CLAIM**

The ornamental design for a streamlined patient communication device display screen with graphical user interface, as shown and described.

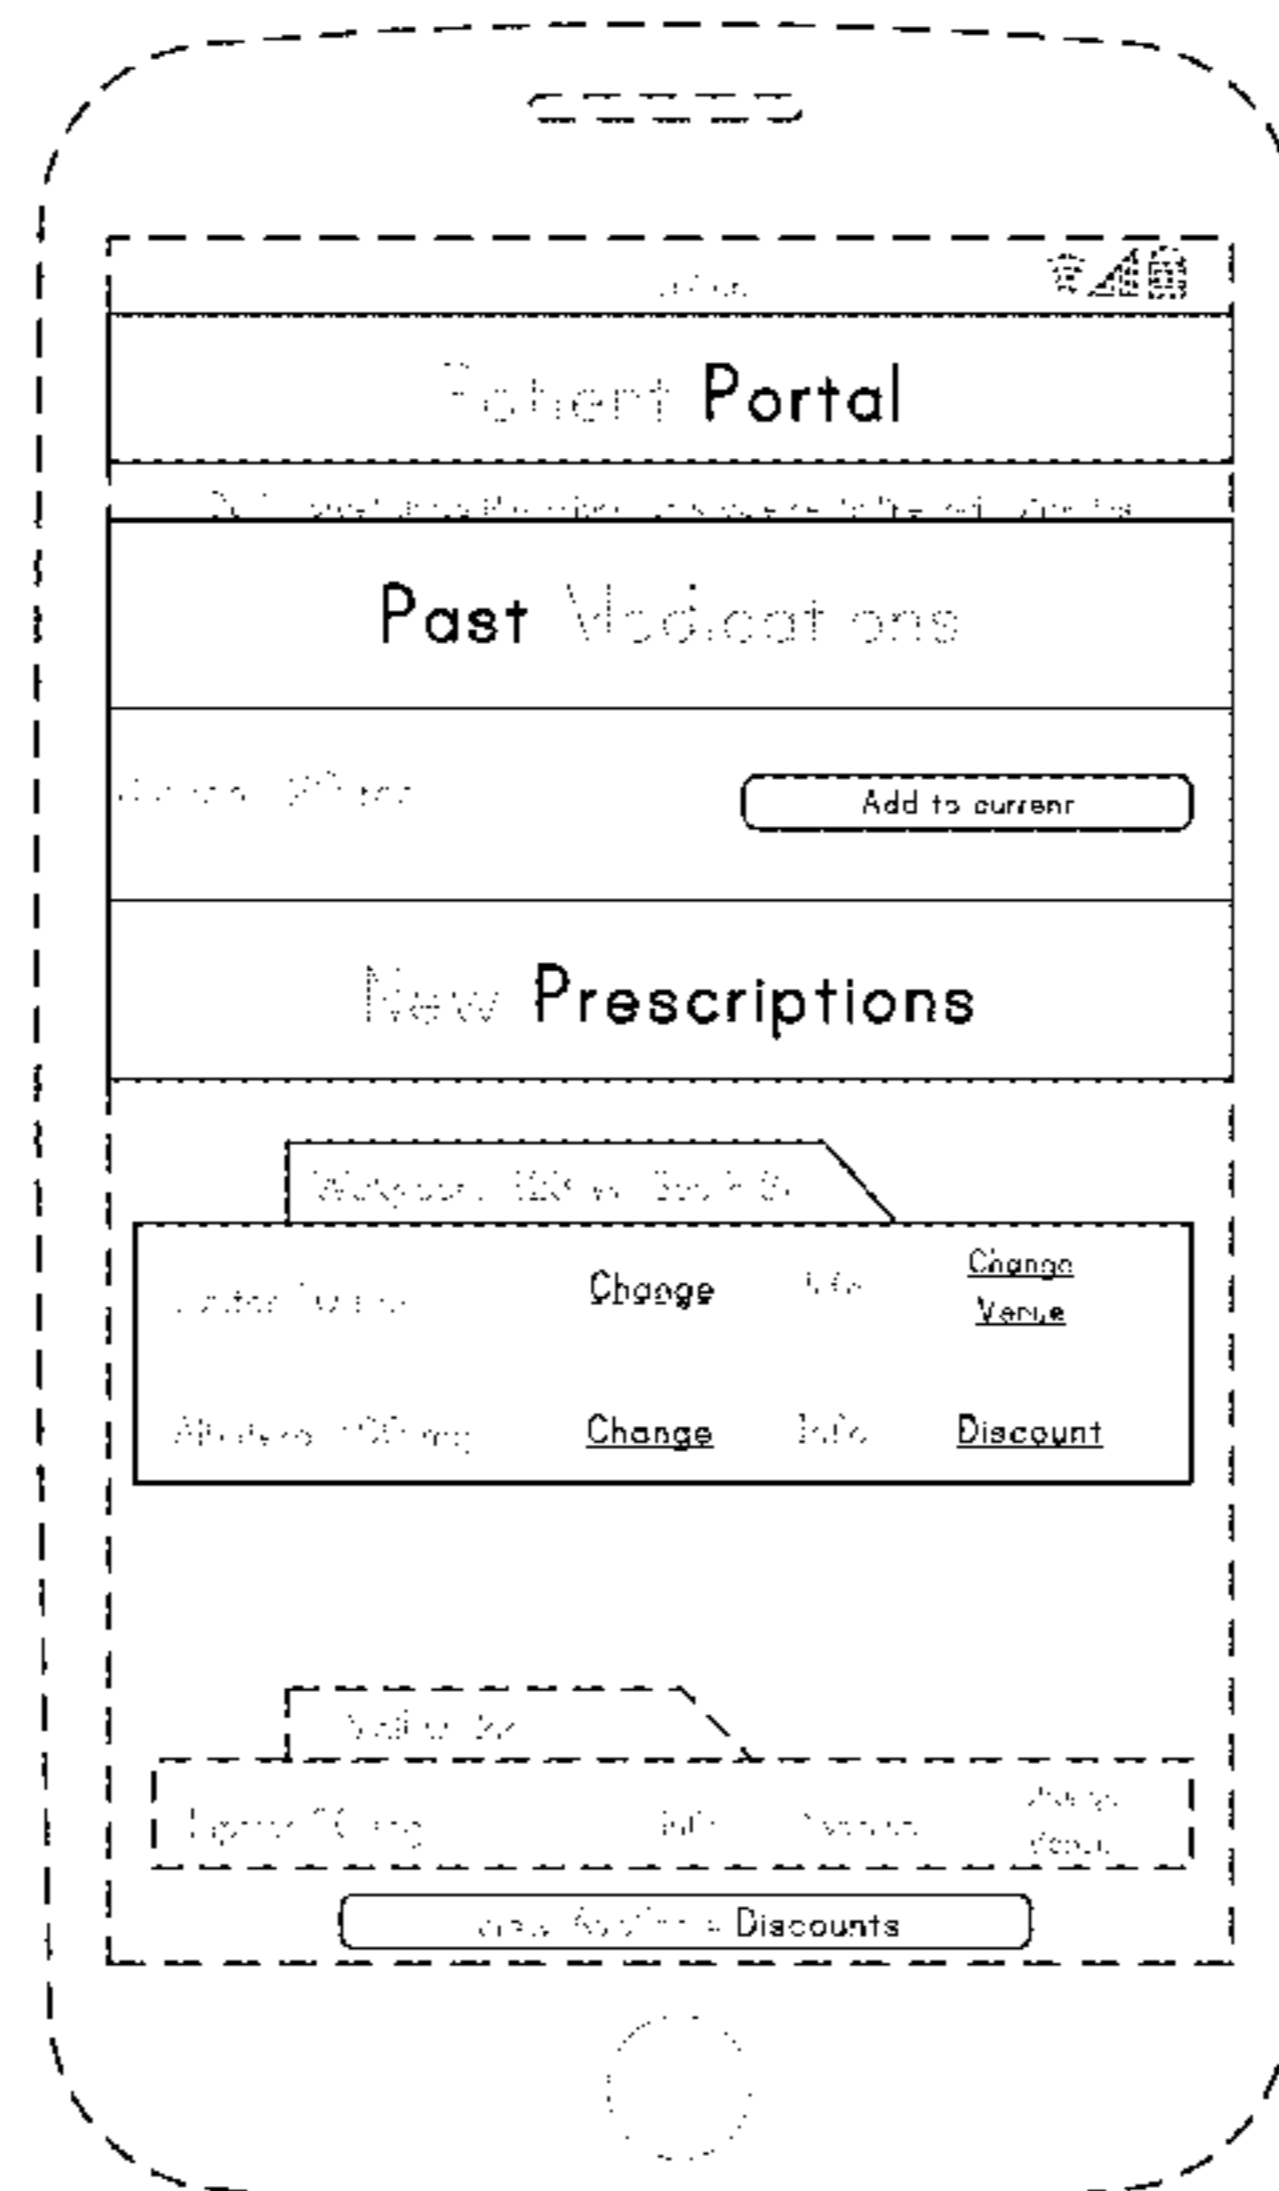

DESCRIPTION

The FIGURE is a front view of a streamlined patient communication device display screen with graphical user interface.

The largest rectangular outline in broken and solid outline shows a display screen. All broken lines outside the display screen show a device. All broken lines within the display screen show portions of the graphical user interface. None of the aforementioned broken lines form any part of the claimed design.
