(57) **CLAIM**

The ornamental design for a microscope display screen with graphical user interface, as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 shows a graphical user interface element on a display screen of a microscope system, in a first position;

FIG. 2 shows a graphical user interface element on the display screen of the microscope system, in a second position according to the embodiment of FIG. 1;

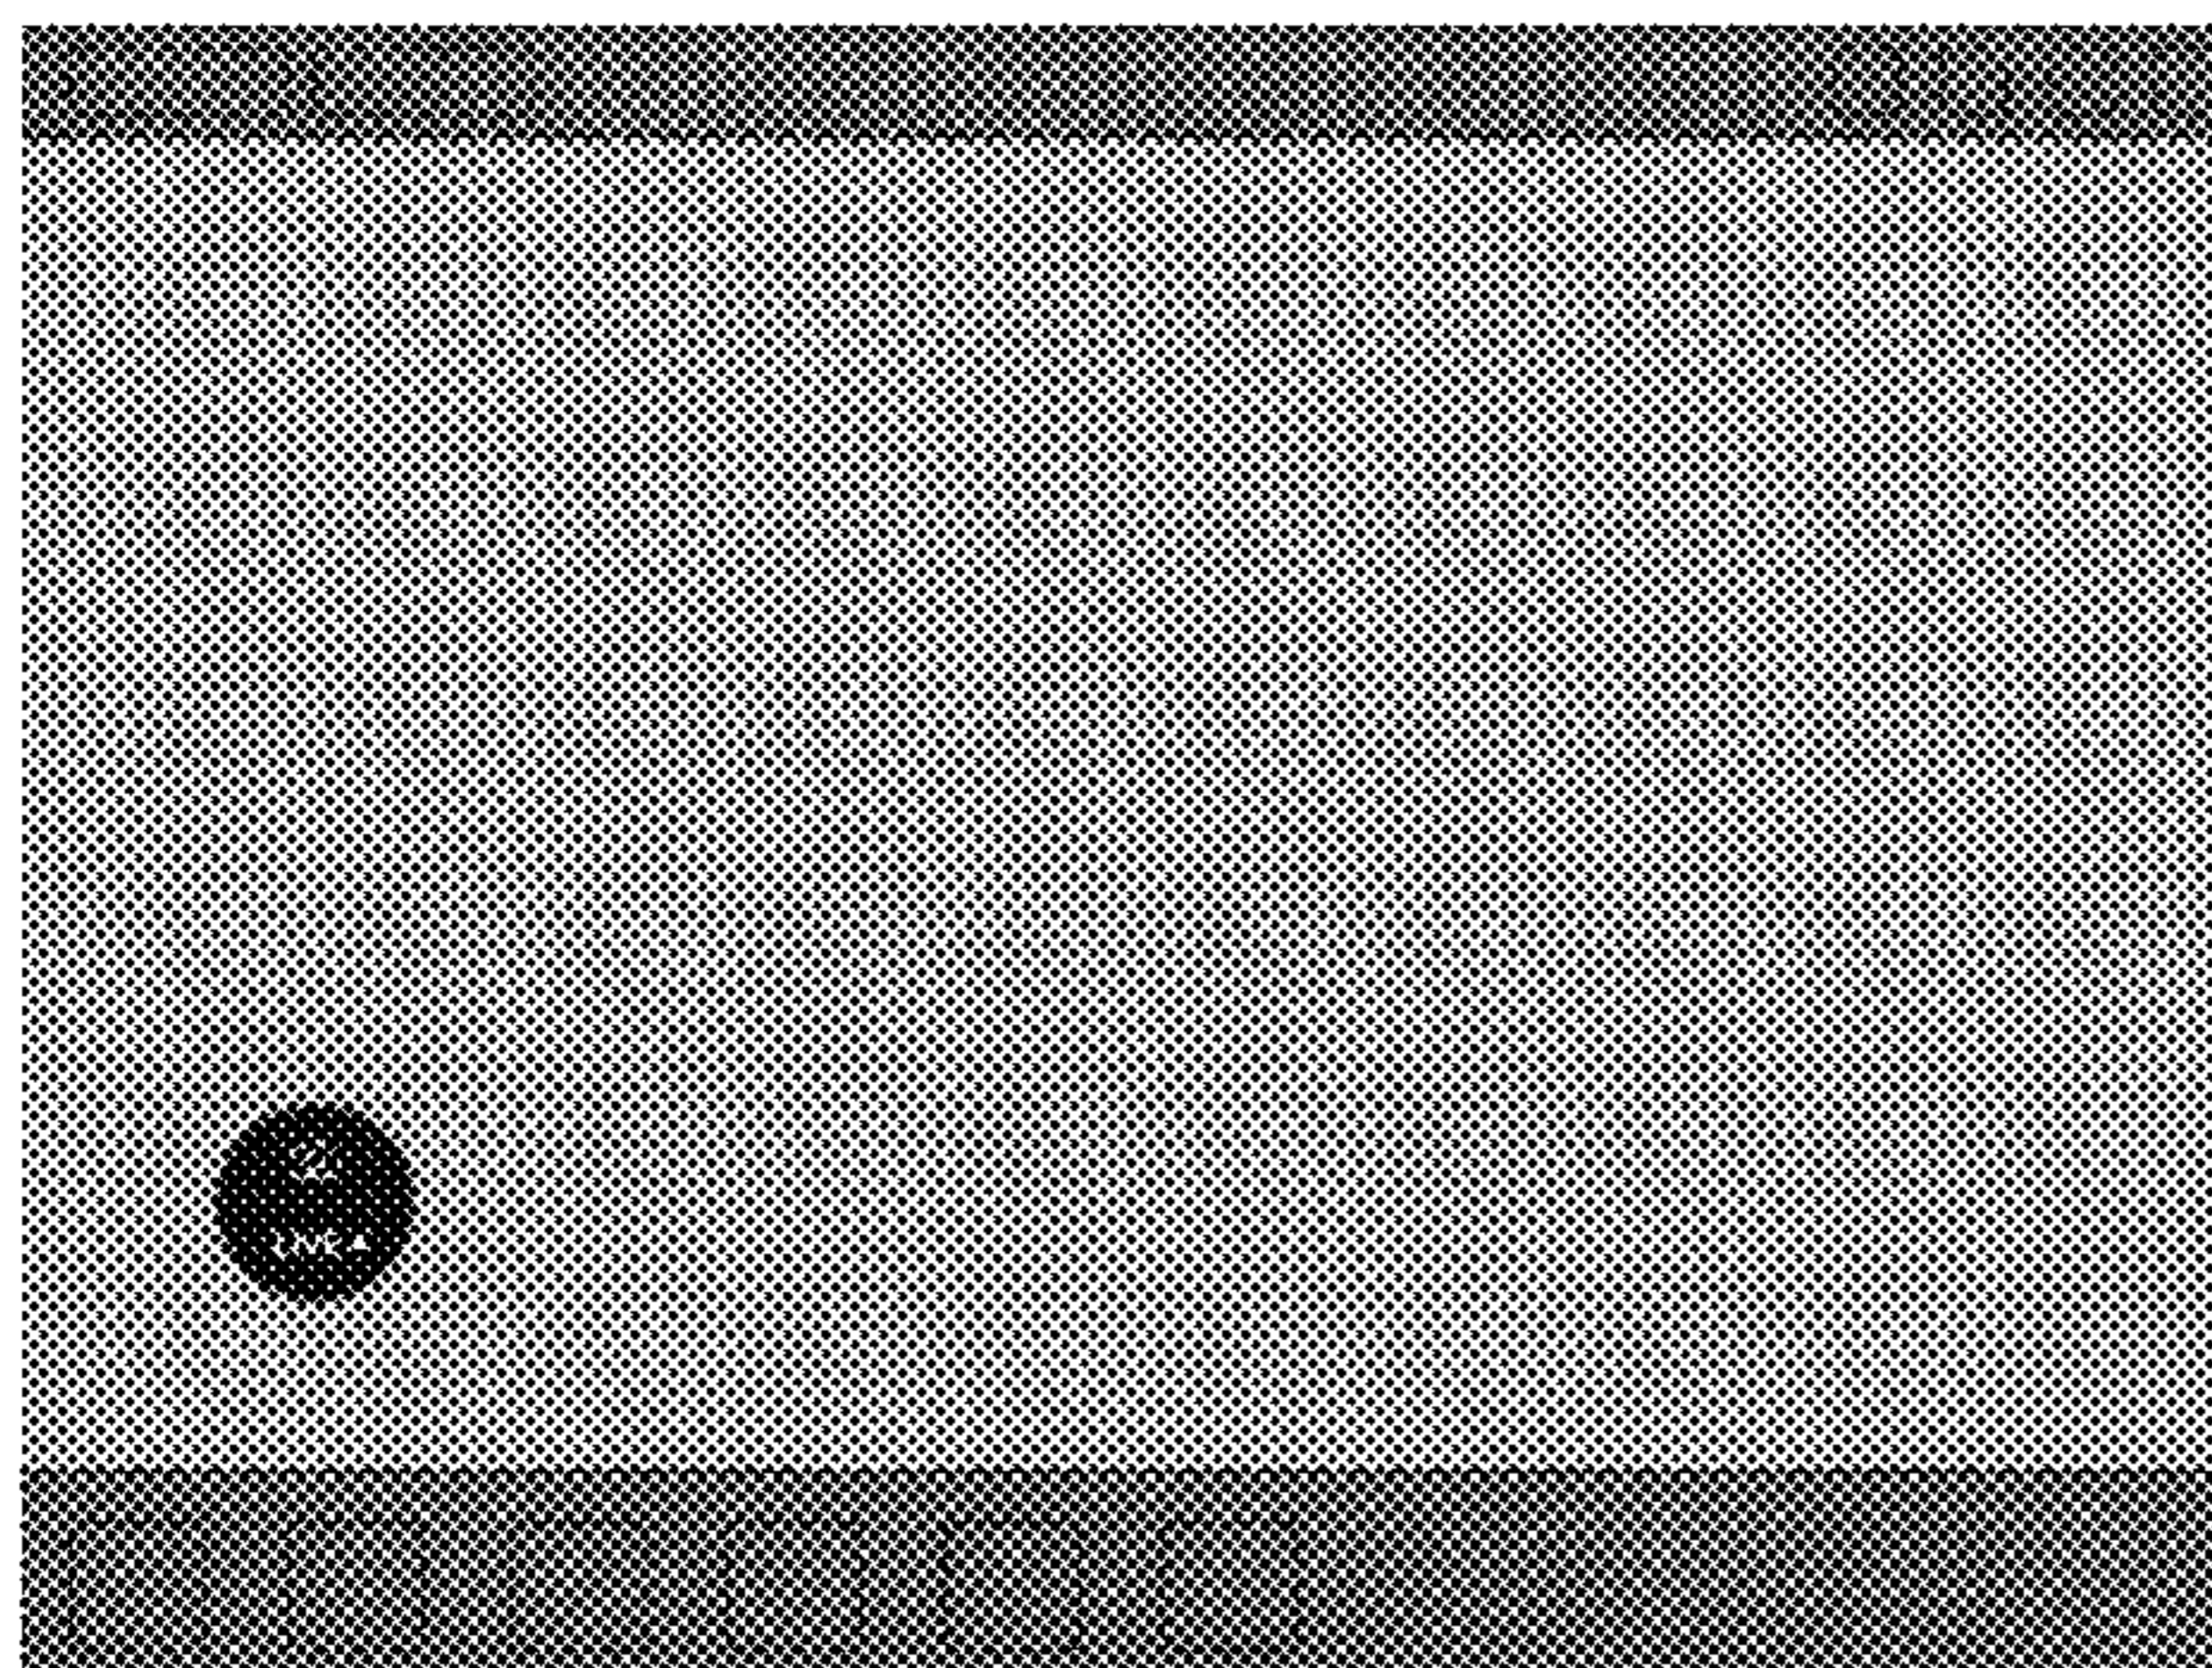

FIG. 3 shows a graphical user interface element on a display screen of a microscope system, in a first position according to another embodiment of the invention; and,

FIG. 4 shows a graphical user interface element on the display screen of the microscope system, in a second position according to the embodiment of FIG. 3.

The description of a “first position” and a “second position” in the above embodiments indicates first and second position in relation to movement of the icon(s) shown in each embodiment, where the appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2, and 3-4, respectively. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken lines showing of a display screen with graphical user interface are included for the purpose of showing portions of the article that form no part of the claimed design. Elements shown in broken line within other broken line portions form no part of the claim.

1 Claim, 4 Drawing Sheets
