This application is related to U.S. Design patent application Ser. No. 29/669,166 entitled "Display Screen With Graphical User Interface", which was filed on the same date as this application and is incorporated by reference in its entirety. FIG. 1 is a front view of a first embodiment of a display screen with graphical user interface showing our new design; and, FIG. 2 is a front view of a second embodiment thereof. The outer broken line perimeter showing the display screen and the broken lines within showing text and elements of the graphical user interface are provided for the purpose of illustrating portions of the article and form no part of the claimed design. The sections of the graphical user interface that have shading form a part of the claimed design and indicate a contrast of appearance.
