See application file for complete search history.

FIG. 1 is a front perspective view of an embodiment of a tire, showing our new design, it being understood that the tread pattern is repeated throughout the circumference of the tire the back perspective view being a mirror image of that shown;

FIG. 2 is a right side view thereof;
FIG. 3 is a front view thereof, with the rear view being a mirror image of the front view; and,
FIG. 4 is a left side view thereof.

The portions depicted in broken lines of uneven length define the unclaimed boundary of the claimed design. The broken lines of even length shown in the drawings illustrate portions of the tire that form no part of the claimed design. The oblong features having denser shading represent cavities in the tread.
