(57) **CLAIM**

The ornamental design for a tire, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire taken generally from a front and a first side of the tire;
 FIG. 2 is a front view thereof (and the top, bottom, and rear views are the same based on the repeating nature of the tread design pattern throughout the circumference);
 FIG. 3 is a first side view thereof;
 FIG. 4 is an enlarged, partial perspective view taken generally from the front and the first side thereof;
 FIG. 5 is an enlarged, partial front view thereof;
 FIG. 6 is an enlarged, partial view of the first side thereof;
 FIG. 7 is a perspective view of the tire taken generally from the front and a second side thereof;
 FIG. 8 is the second side view thereof;
 FIG. 9 is an enlarged, partial perspective view taken generally from the front and the second side thereof; and,
 FIG. 10 is an enlarged, partial view of the second side thereof.

The broken lines and the sidewall region between the broken lines that define the inner bead and the sidewall depict subject matter that forms no part of the claimed tire design and are included for the purpose of illustrating the full tire. Likewise, the tire interior forms no part of the claim. The tread pattern is understood to repeat throughout the circumference of the tire.

1 Claim, 10 Drawing Sheets
