(57) **CLAIM**

The ornamental design for a tulip glass, as shown and described.

(**) Term: **15 Years**

DESCRIPTION

(21) Appl. No.: **29/728,846**

Design Pat. No. USD663165S1 by two of the same inventors herein established the straight, angled rim flare portion of this patent. Design Pat. No. US20130273224A1 filed with USPTO on Jun. 27, 2011, published Oct. 17, 2013 with utility patent application subsequently submitted and is at this submission under examination.

(22) Filed: **Mar. 21, 2020**

FIG. 1 is a top view of a tulip glass showing my new design; FIG. 2 is a cross sectional view thereof showing a section taken along line 2-2 of FIG. 1;

Ornamental design features are distinctive straight bowl sides vertically convergent from the lower part of the bowl toward the rim, straight angled flare, stem, and foot to eliminate all visual curves in elevation except minimal radii which may be required for manufacturing feasibility between the convergent angled sides and flares, and are required for the attachment of stem to lower bowl and foot to stem, a straight flare at the top rim of the vessel, and a substantially large diameter stem and substantially thick vertical height foot.
