(57) **CLAIM**

The ornamental design for a display screen or portion thereof with a graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence of a display screen or portion thereof with a graphical user interface, showing the new design;

FIG. 2 is a front view of a second image thereof, shown without the broken line environment for clarity of disclosure; and,

FIG. 3 is a front view of a third image thereof.

The appearance of the animated image sequentially transitions between the images shown in FIGS. 1 through 3. The process or period in which one image transitions to another forms no part of the claimed design.

The outermost broken lines in FIG. 1 illustrate the environment of the design and form no part of the claim. The remaining broken lines, including all text, illustrate portions of the display screen or portions of the graphical user interface that form no part of the claimed design.

The dash-dot and dash-dot-dot broken lines illustrate the boundaries of the design. The gray-shaded region between the boundary lines forms no part of the claimed design. The region enclosed by the dash-dot-dot boundary lines form part of the claimed design.
