(57) **CLAIM**

The ornamental design for a display panel with transitional graphical user interface, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing/photograph executed in color, and copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

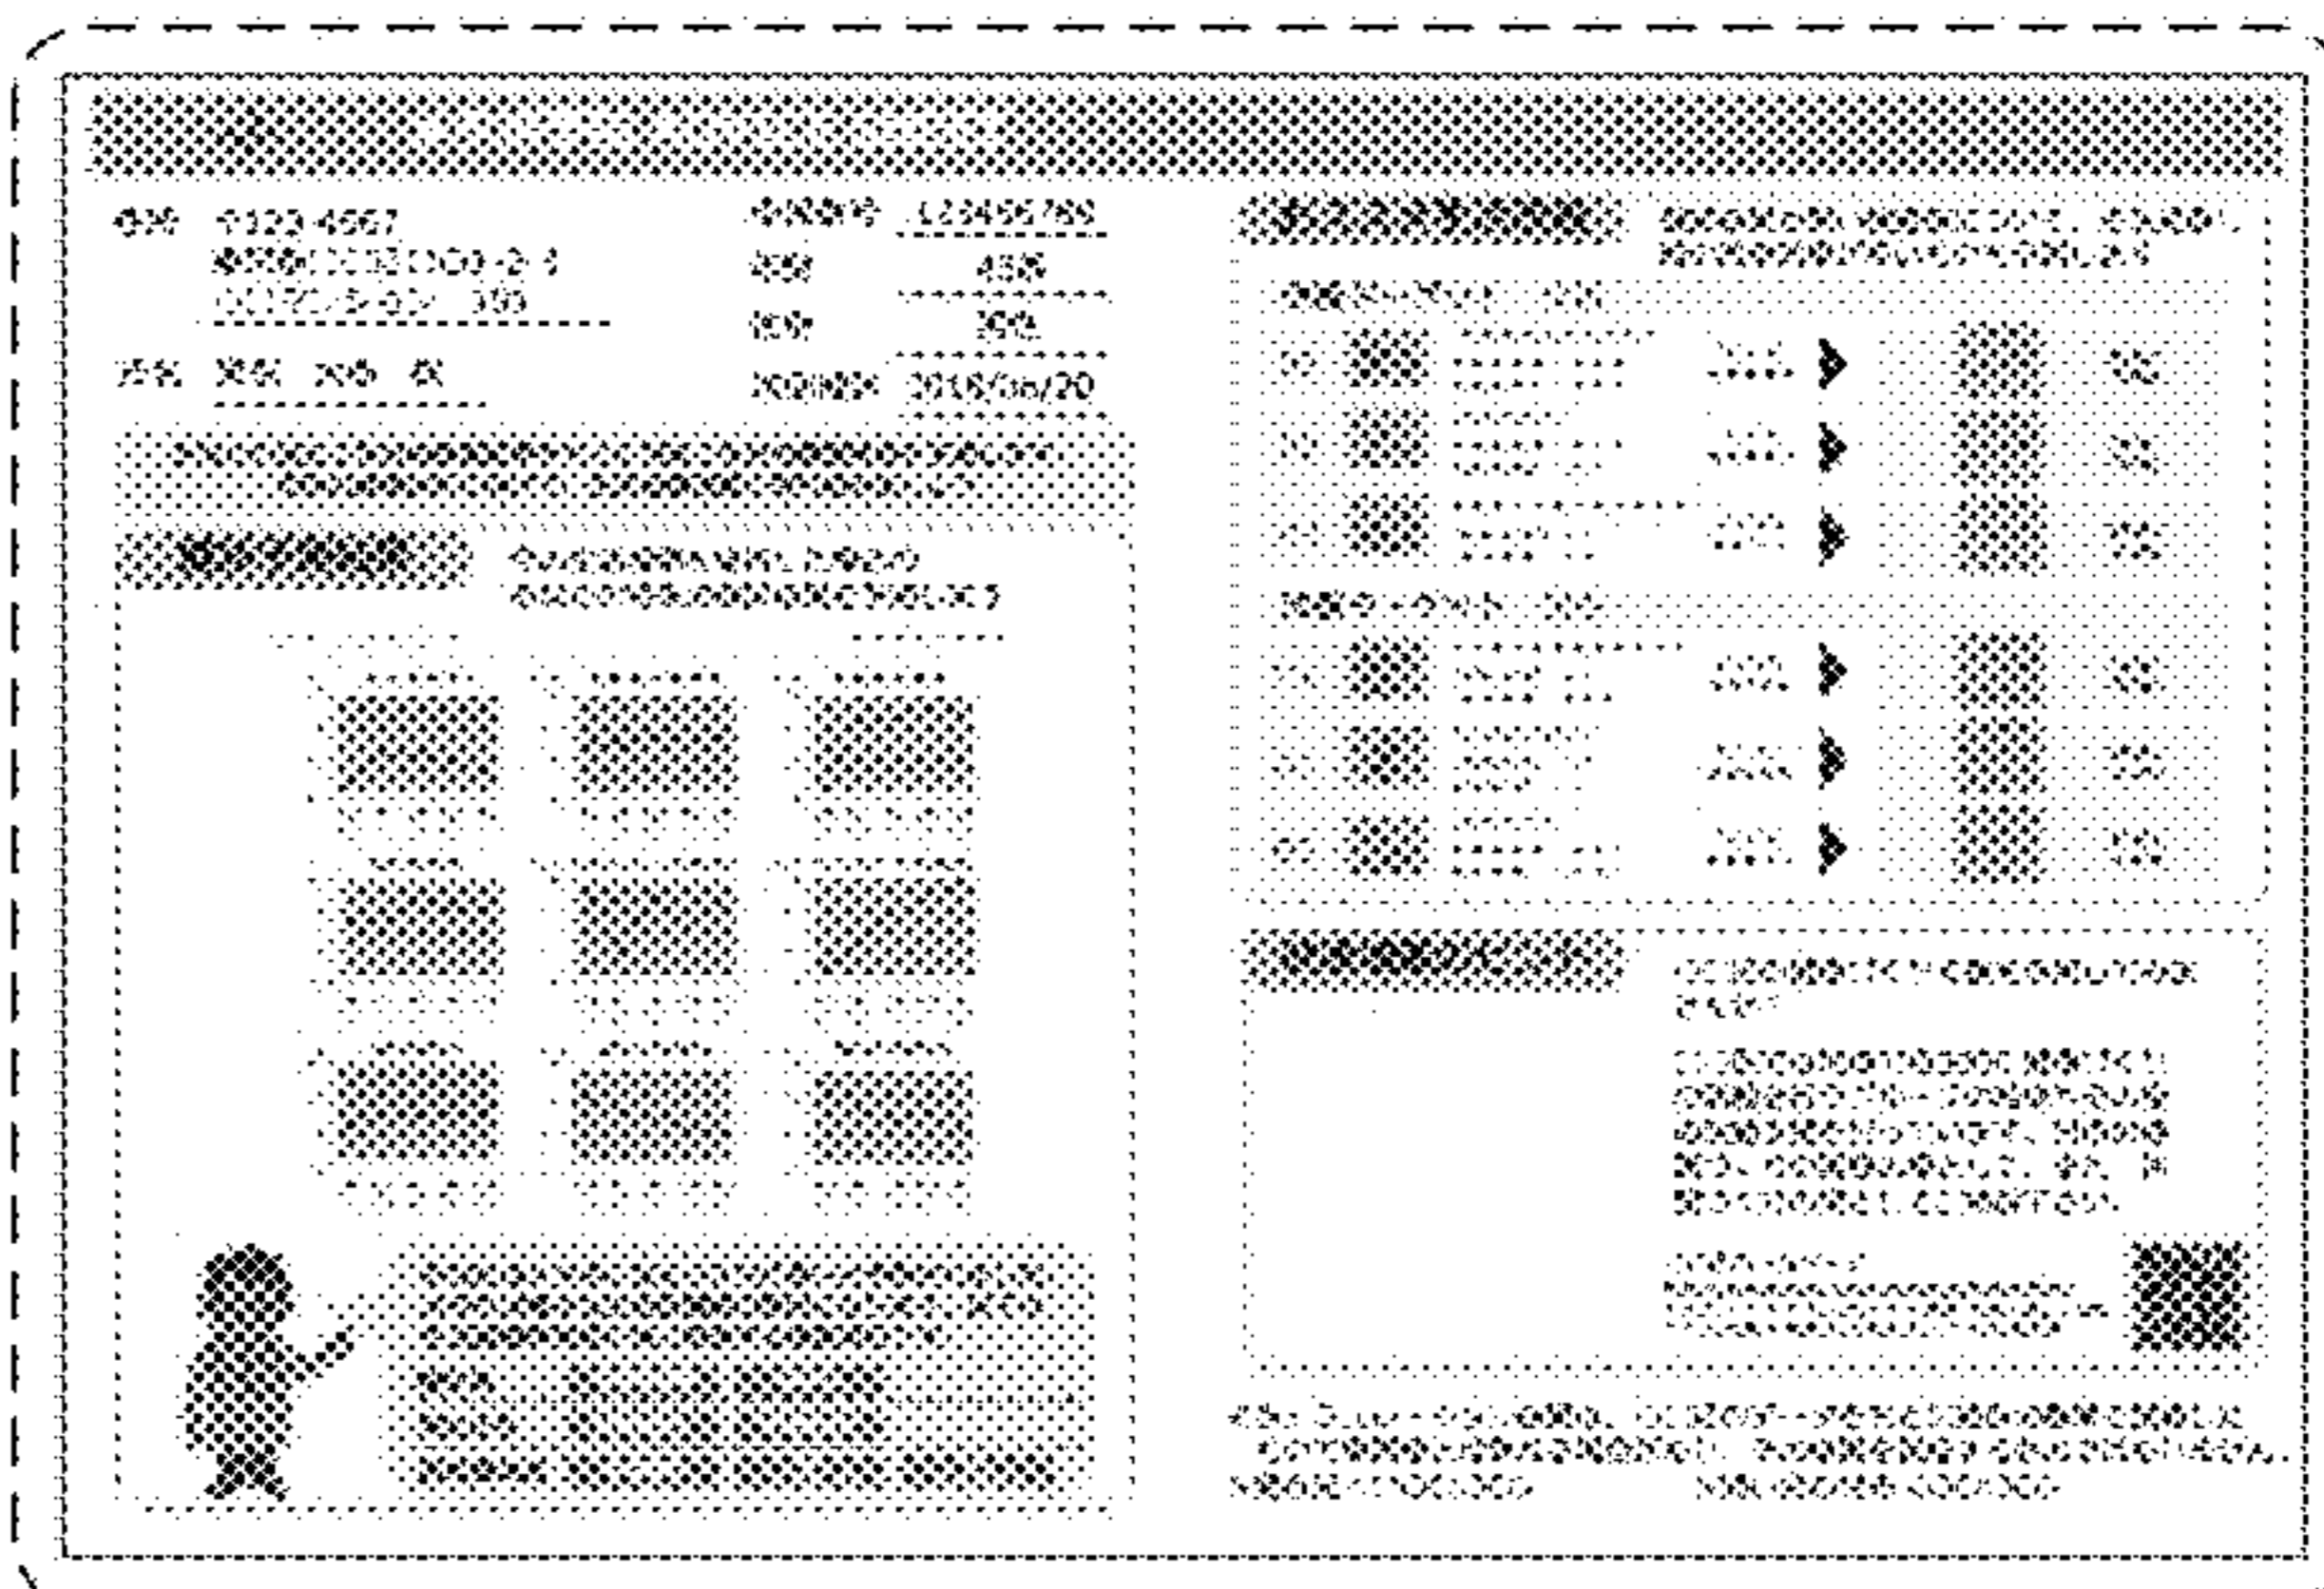

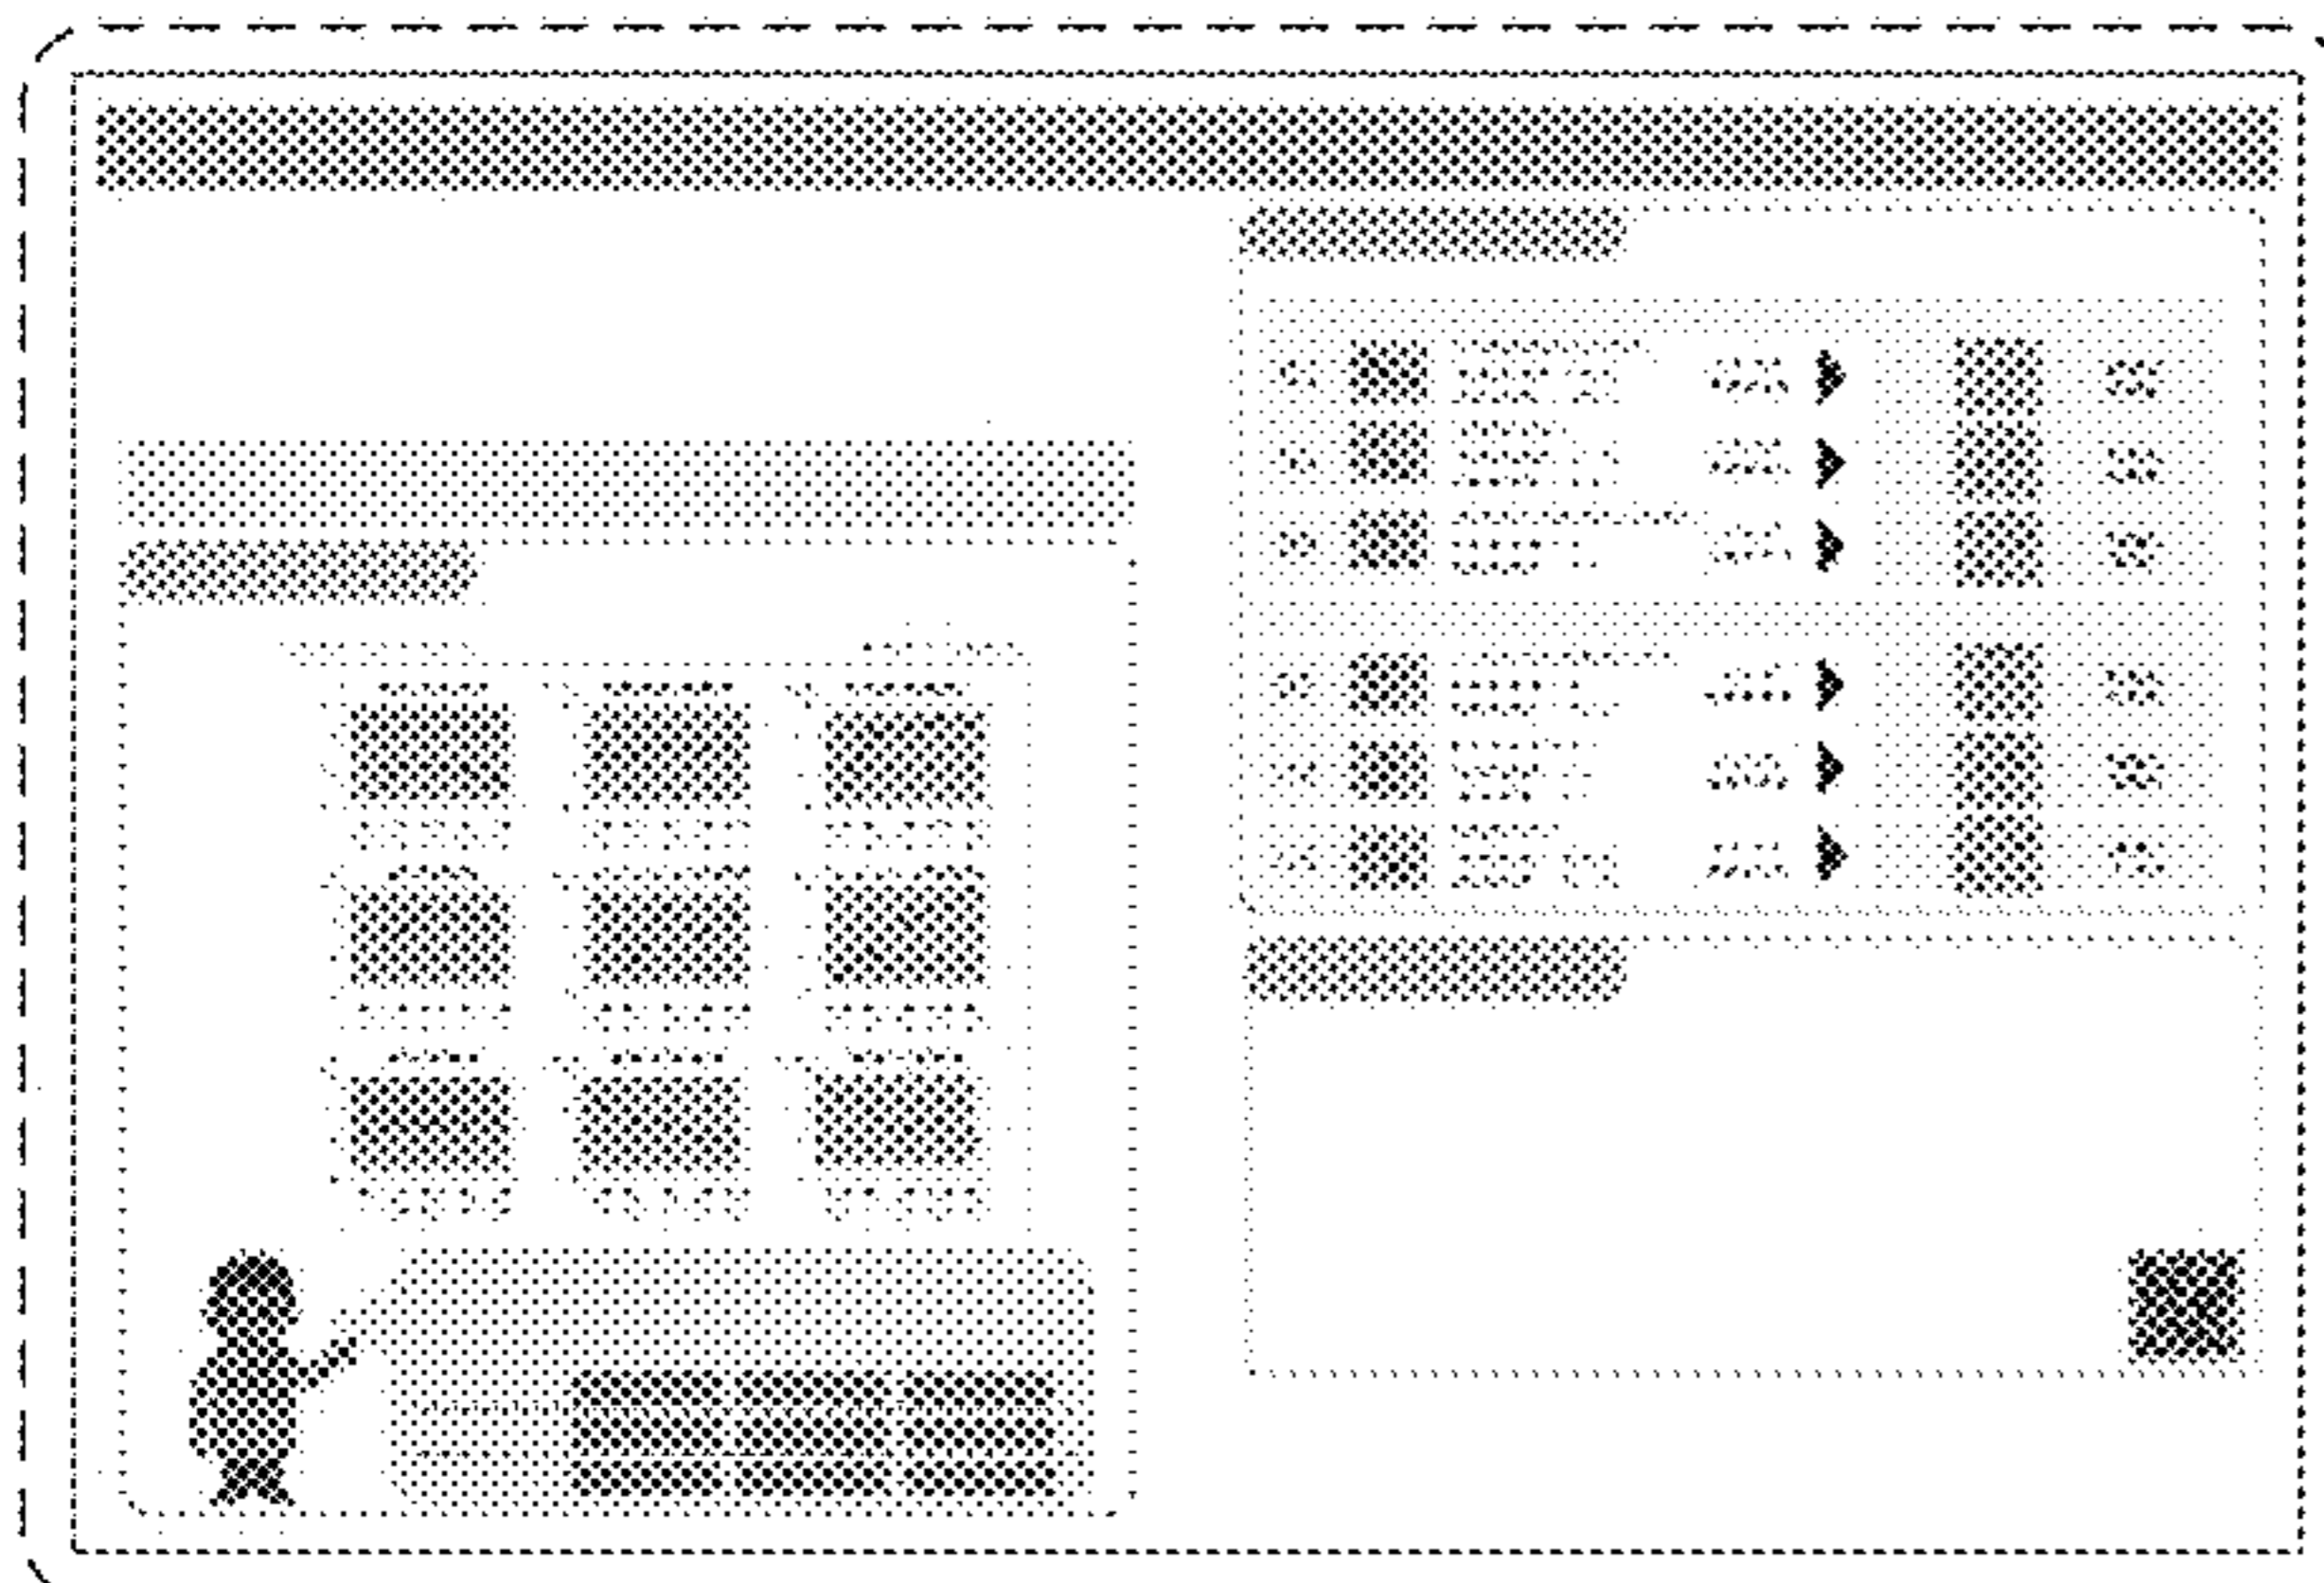

FIG. 1 is a front view of a display panel with transitional graphical user interface showing a first image in a sequence; and,

FIG. 2 is a front view of a second image in the sequence. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken lines showing a display panel form no part of the claimed design.

The broken lines showing portions of the graphical user interface form part of the claimed design.
