(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence of a display screen with animated graphical user interface, showing the new design;

FIG. 2 is a second image thereof;

FIG. 3 is a third image thereof;

FIG. 4 is a fourth image thereof;

FIG. 5 is a fifth image thereof;

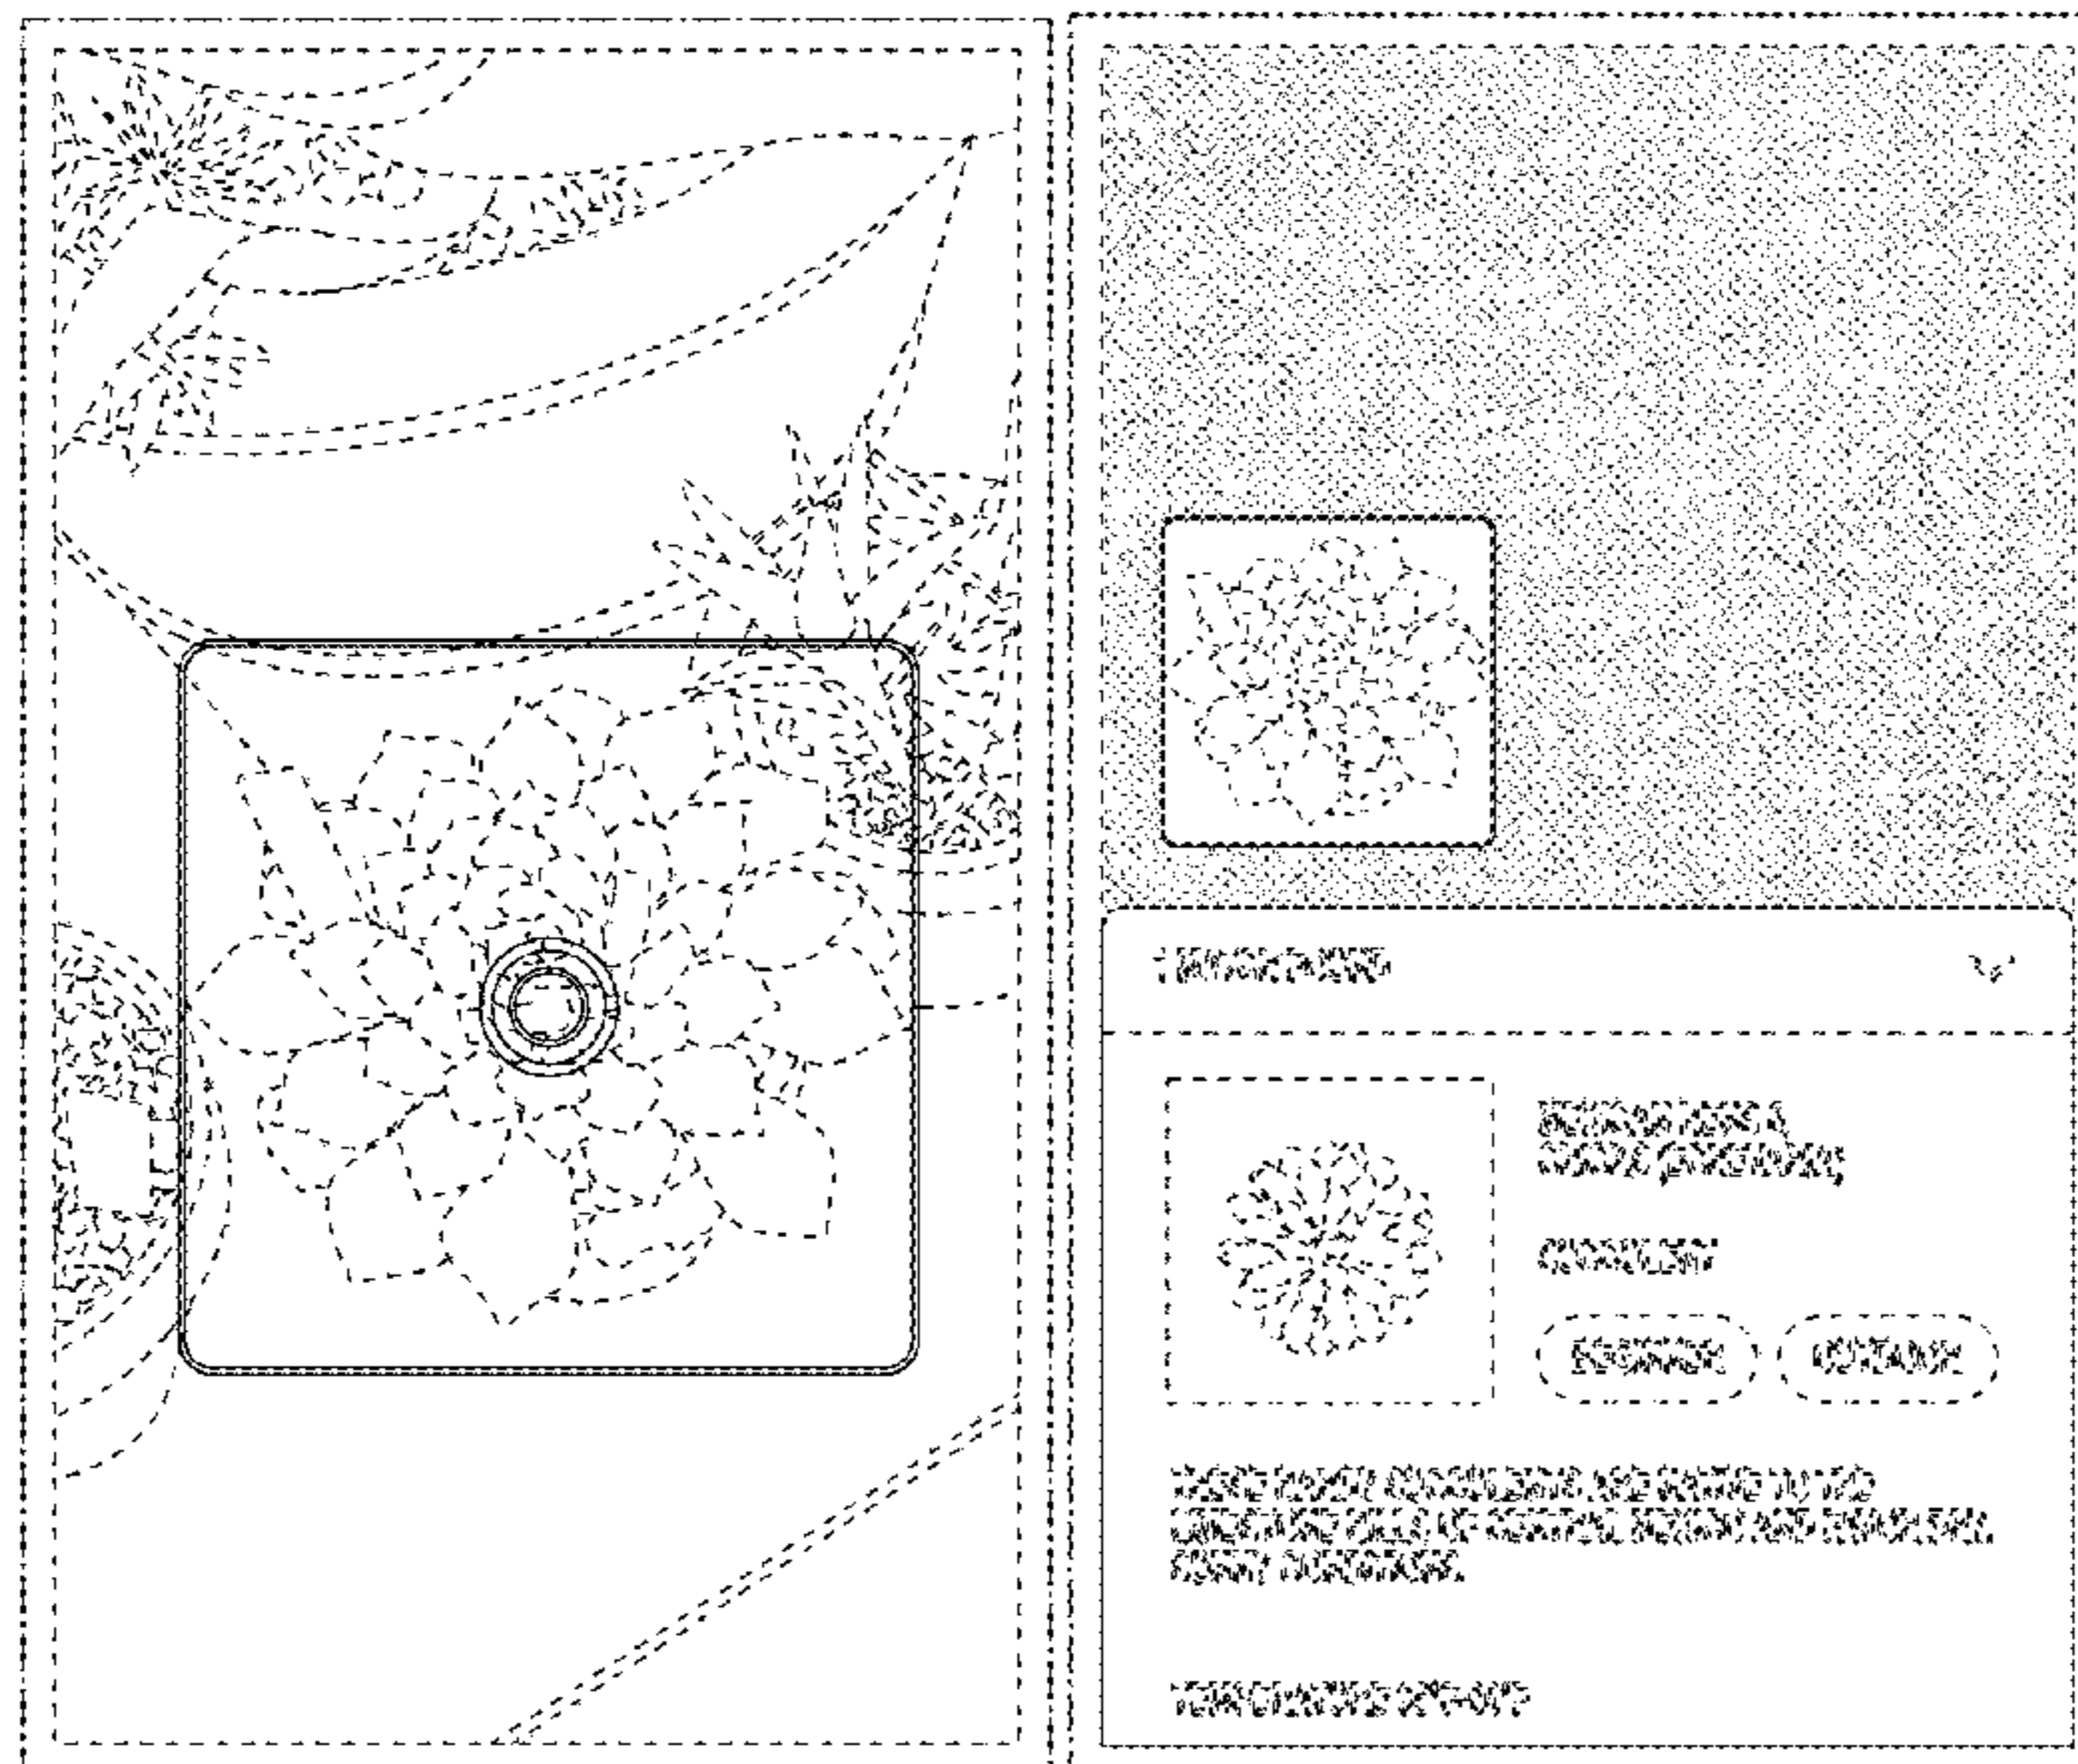

FIG. 6 is a sixth image thereof; and,

FIG. 7 is a seventh image thereof.

The stippling portrays the illusion of translucent portions of the animated graphical user interface through which portions of the unclaimed user-defined content are partially visible. The appearance of the image transitions between the images shown in FIGS. 1-7. The process or period in which an image transitions to another image forms no part of the claimed design.

The broken lines of even length show the animated graphical user interface and form no part of the claimed design.

1 Claim, 7 Drawing Sheets
