(57) **CLAIM**

The ornamental design for a cup anemometer, substantially as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of a cup anemometer in accordance with the present invention;

FIG. 2 is a right side view of the cup anemometer shown in FIG. 1;

FIG. 3 is a left side view of the cup anemometer shown in FIG. 1;

FIG. 4 is a front view of the cup anemometer shown in FIG. 1;

FIG. 5 is a back view of the cup anemometer shown in FIG. 1;

FIG. 6 is a top view of the cup anemometer shown in FIG. 1; and,

FIG. 7 is a bottom view of the cup anemometer shown in FIG. 1.

In general, the invention pertains to an ornamental design for an article of manufacture. The article of manufacture can vary widely and can be scaled to different sizes depending on the article of manufacture. In one embodiment, as indicated above, the article of manufacture is a cup anemometer or component thereof. In another embodiment, the article of manufacture is a novelty item, such as a toy.

The features shown in broken lines in the various Figures are for illustrating the environmental structure and form no part of the claimed design.
