(57) **CLAIM**

The ornamental design for a display panel or screen with a graphical user interface, as shown and described.

DESCRIPTION

This application is a continuation of U.S. Design patent application Ser. No. 29/549,964 filed on Dec. 29, 2015, now U.S. Pat. No. D812,623.
FIG. 1 is a front view of a first embodiment of a display screen with a first image of a transitional graphical user interface showing our new design; and
FIG. 2 is a second image thereof.
FIG. 3 is a front view of a second embodiment of a display screen with a first image of a transitional graphical user interface showing our new design; and,
FIG. 4 is a second image thereof.
The outermost broken line perimeter showing the display screen and the broken lines within showing portions of the transitional graphical user interface, including the broken line text, are provided for the purpose of illustrating portions of the display screen and form no part of the claimed design. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 and 2, and FIGS. 3 and 4 respectively. The process or period that one image transitions to another image forms no part of the claimed design.
