DESCRIPTION

FIG. 1 is a front view of a display screen with animated graphical user interface showing a first image in a sequence of the animated graphical user interface according to the claimed design.

FIG. 2 is a front view of the display screen with animated graphical user interface showing a second image in the sequence of the animated graphical user interface of FIG. 1.

FIG. 3 is a front view of the display screen with animated graphical user interface showing the first image in the sequence of the animated graphical user interface in an example use environment.

FIG. 4 is a front view of the display screen with animated graphical user interface showing the second image in the sequence of the animated graphical user interface in the example use environment of FIG. 3.

FIG. 5 is a rear view of the display screen with animated graphical user interface of FIG. 1.

FIG. 6 is a left side view of the display screen with animated graphical user interface of FIG. 1.

FIG. 7 is a right side view of the display screen with animated graphical user interface of FIG. 1.

FIG. 8 is a top view of the display screen with animated graphical user interface of FIG. 1.

FIG. 9 is a bottom view of the display screen with animated graphical user interface of FIG. 1.

FIG. 10 is an enlarged view of the encircled portion in FIG. 2; and,

FIG. 11 is an enlarged view of the encircled portion in FIG. 4.

The dash-dot-dash broken lines showing the display screen in the figures illustrate environmental subject matter that forms no part of the claimed design.

The dash-dash broken lines in FIGS. 1-4 illustrate portions of the animated graphical user interface that form no part of the claimed design.

The dash-dot-dot broken lines in FIGS. 2, 4, and 10-11 indicating the encircled portions form no part of the claimed design.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-2. The process or period in which an image transitions to another forms no part of the claimed design.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 3-4. The process or period in which an image transitions to another forms no part of the claimed design.

The larger dashed lines forming the rectangular border at the central portion of the animated graphical user interface in FIGS. 1 and 3 form part of the claimed design.

The image thumbnails illustrated in broken lines in FIGS. 2 and 4 of the drawings form no part of the claimed design.
