(57) **CLAIM**

The ornamental design for a medical monitor display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first embodiment of a medical monitor display screen or portion thereof with graphical user interface showing my new design; and, FIG. 2 is a front view of another embodiment thereof. The broken line showing of an electronic device illustrates environmental subject matter and forms no part of the claimed design. All other broken lines showing the display screen and portions of the graphical user interface illustrate portions of the article and form no part of the claimed design. Shaded areas form part of the claimed design.
