(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first embodiment of a display screen with transitional graphical user interface according to the claimed design;  
FIG. 2 is a front view of a second image thereof;  
FIG. 3 is a front view of a second embodiment of a display screen with transitional graphical user interface according to the claimed design;  
FIG. 4 is a front view of a second image thereof;  
FIG. 5 is a front view of a third image thereof;  
FIG. 6 is a front view of a fourth image thereof; and,  
FIG. 7 is a front view of a fifth image thereof.  
The appearance of the transition is sequential from FIG. 1 to FIG. 2 in the first embodiment and from FIG. 3 to FIG. 7 in the second embodiment. The process or period in which an image transitions to another image forms no part of the claimed design.

The shading shown in certain features of the drawings indicates a contrast in appearance.

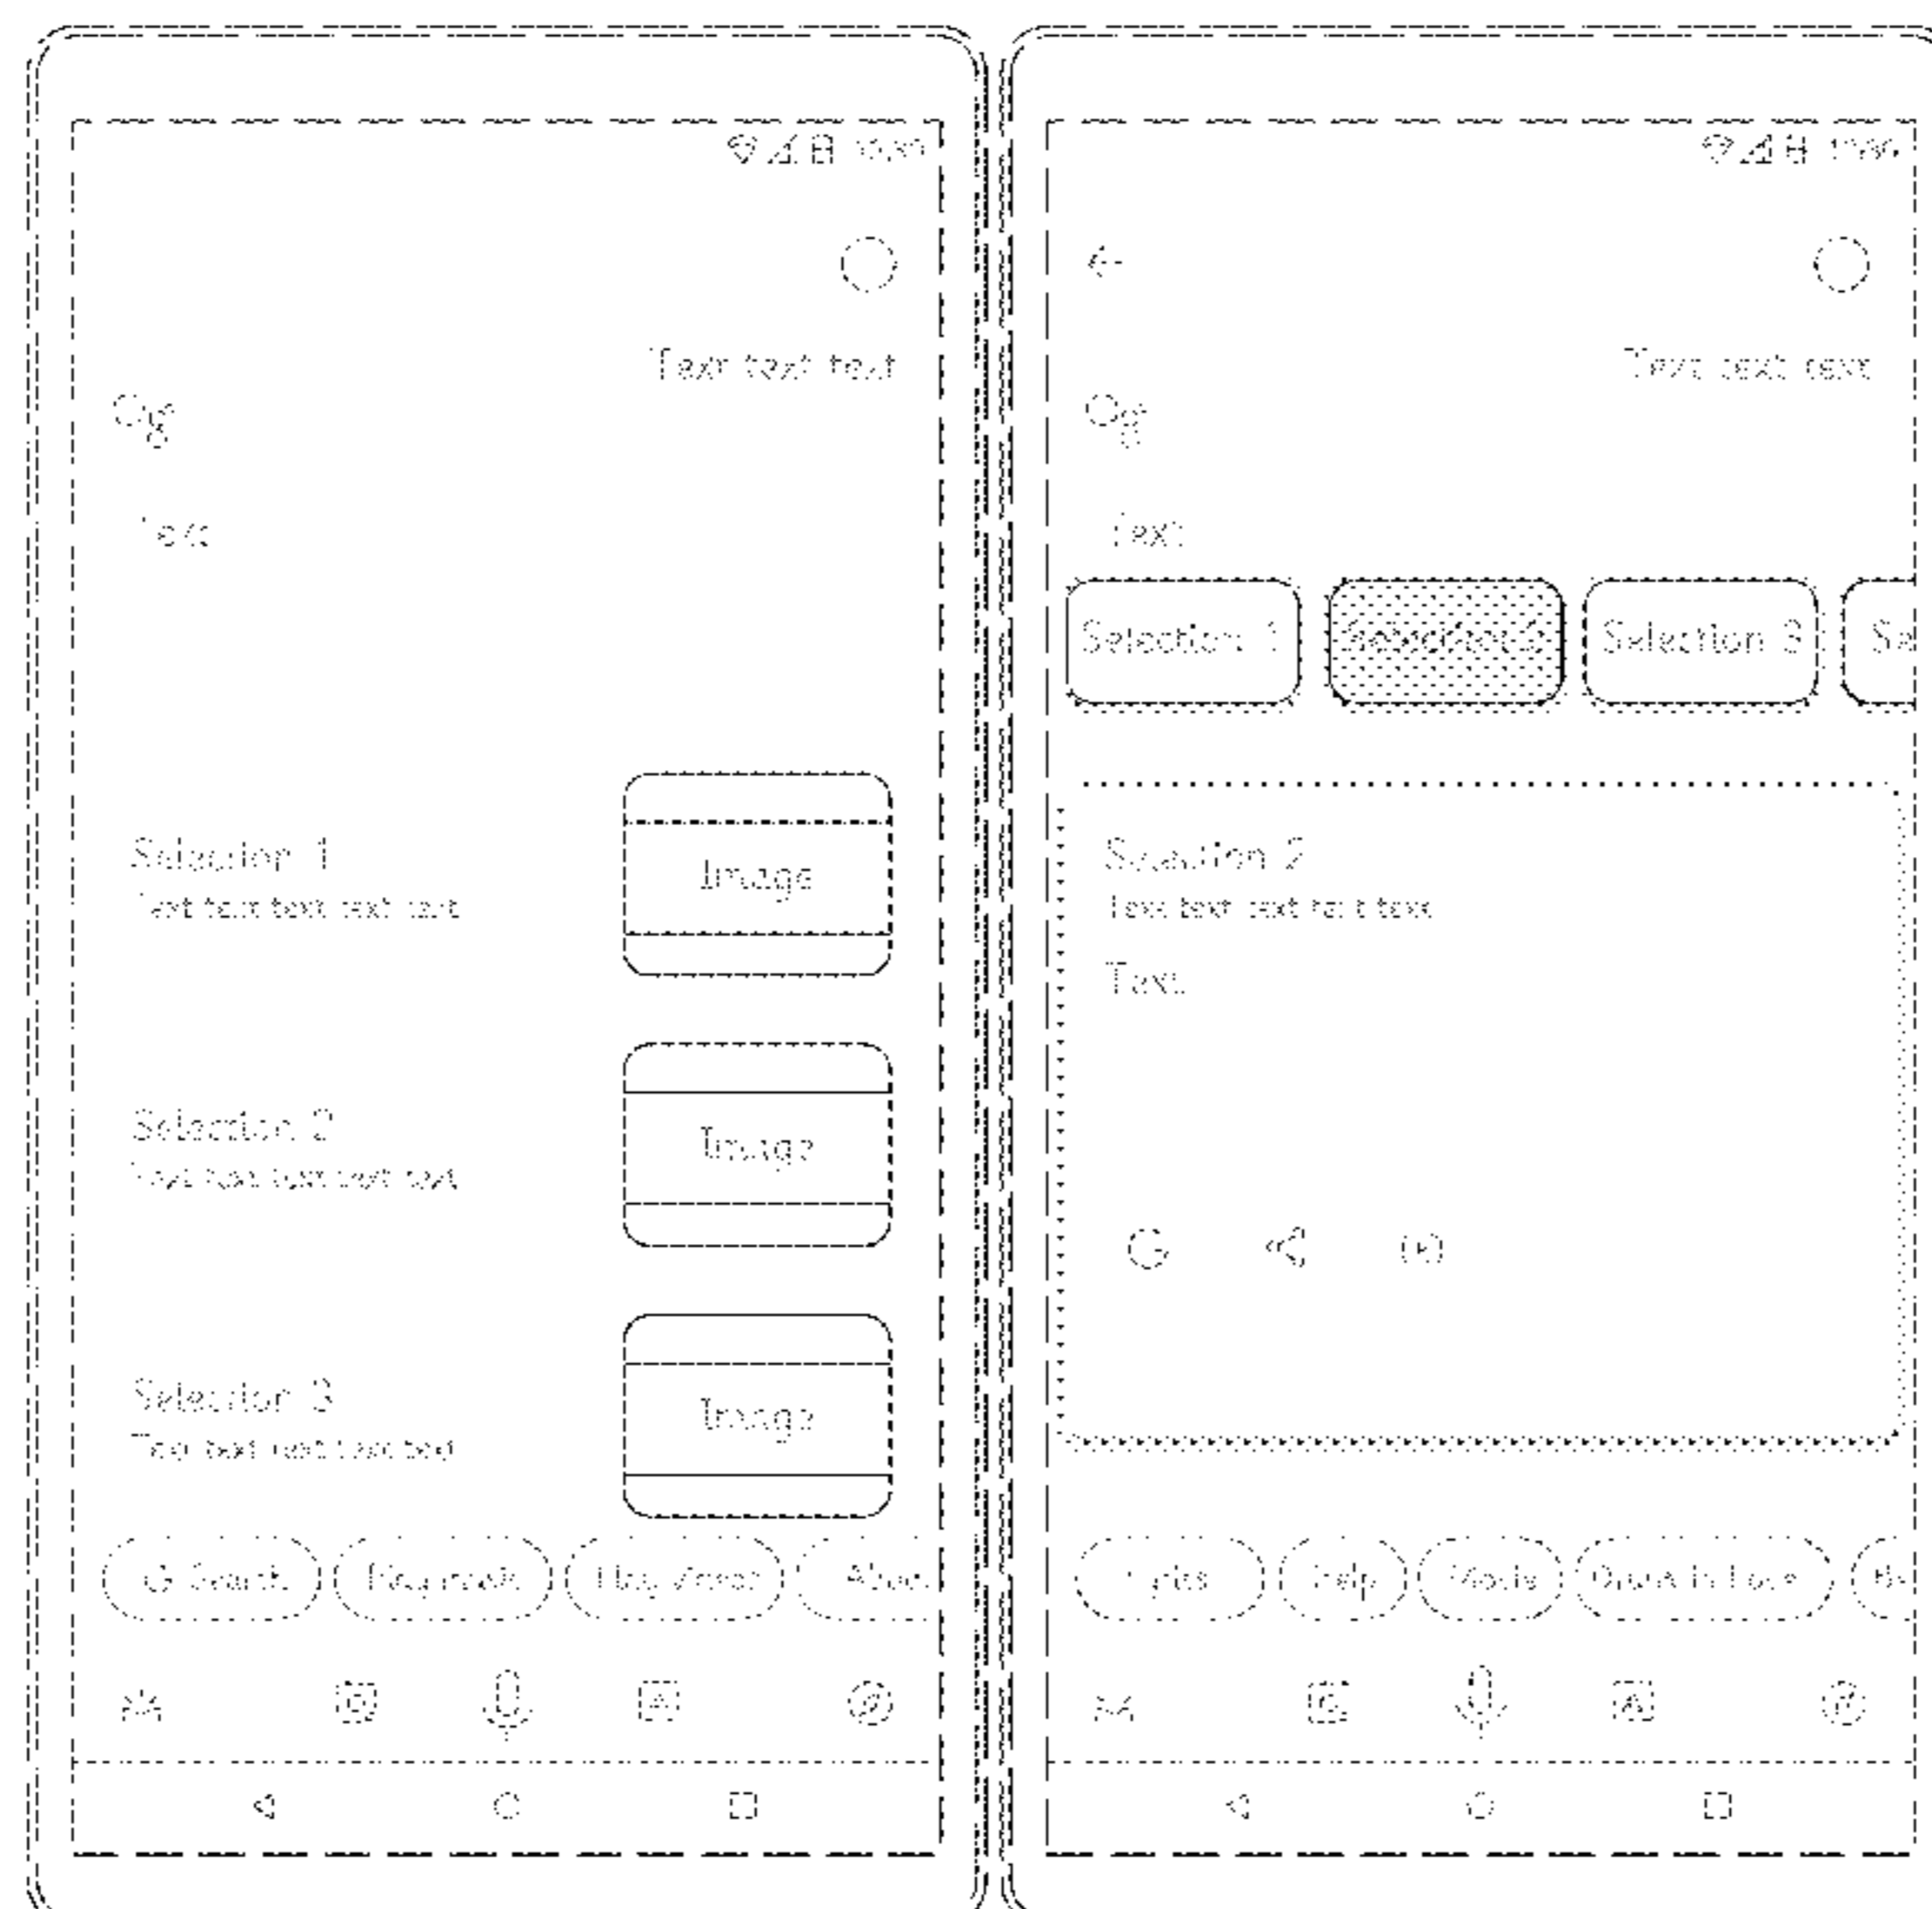

The longer-incremented broken-lines illustrate an electronic device, the intermediate-length broken-lines illustrate a display screen and boundary of the claimed design, and the still shorter broken-lines illustrate portions of the transitional graphical user interface. None of the broken lines form part of the claimed design.
