(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with transitional graphical user interface according to the claimed design; and,

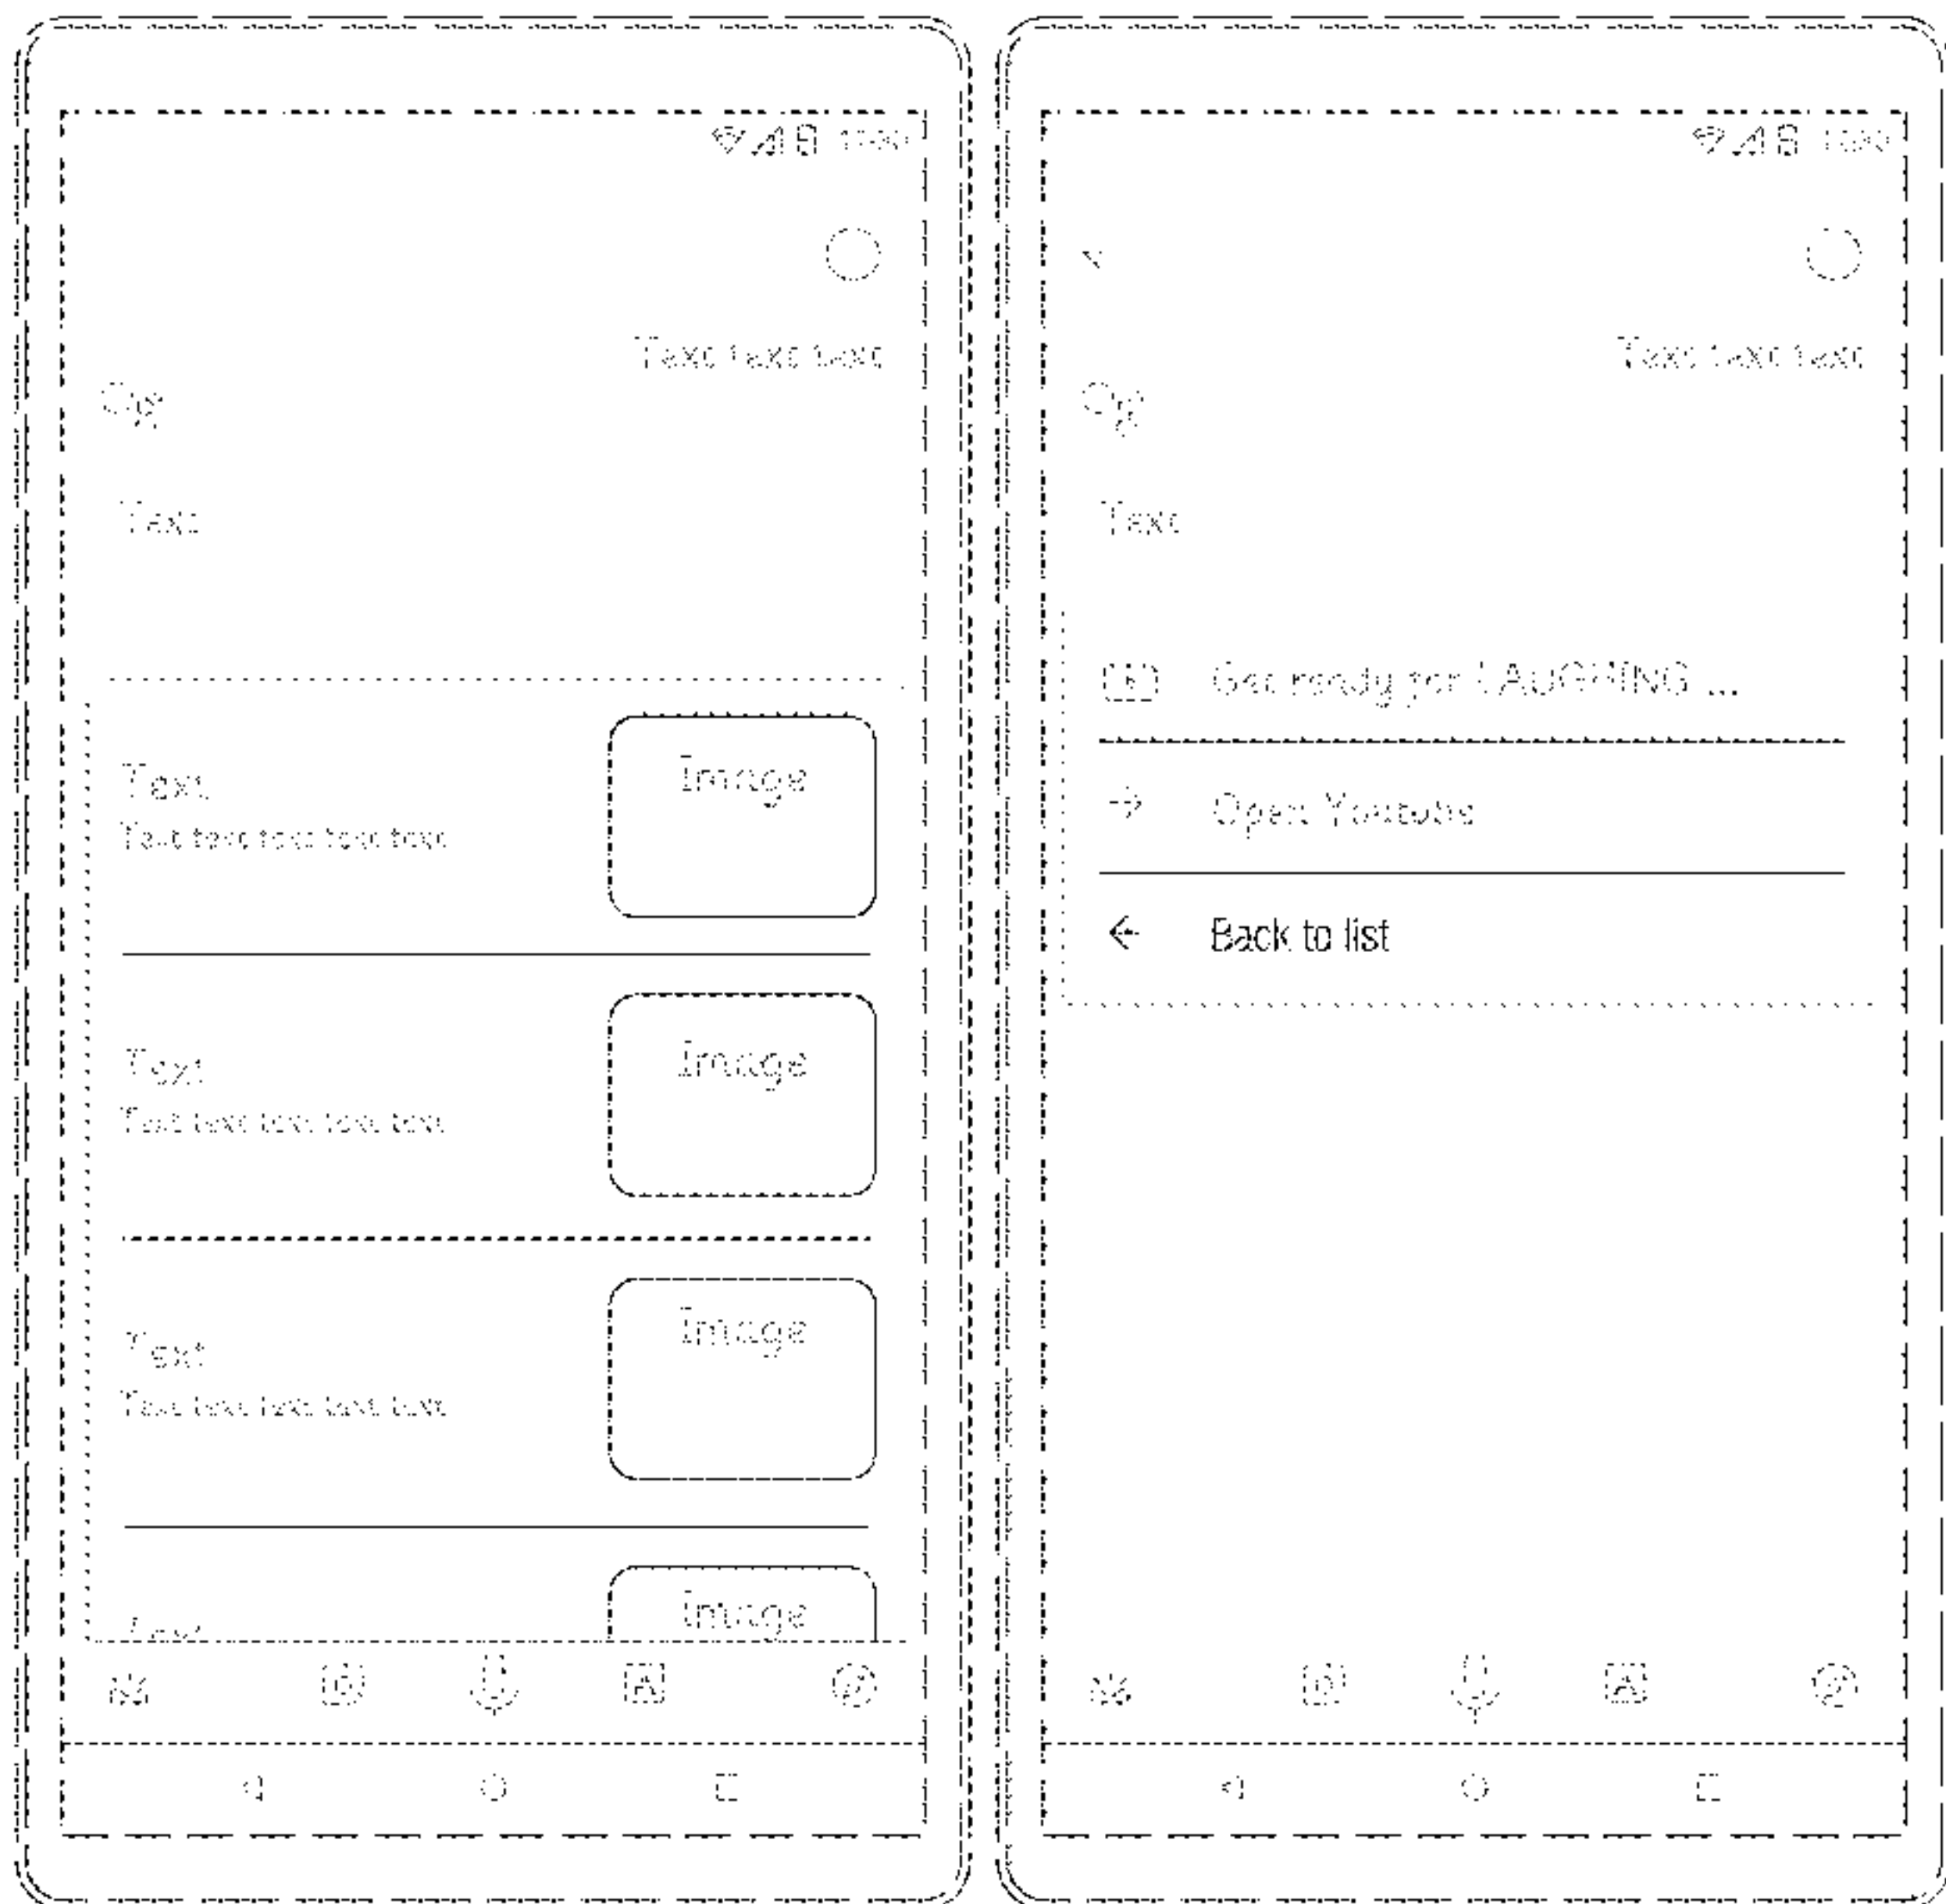

FIG. 2 is a front view of a second image thereof.

The appearance of the transition is sequential from FIG. 1 to FIG. 2. The process or period in which an image transitions to another image forms no part of the claimed design.

The shading shown in certain features of the drawings illustrates a contrast in appearance.

The longer-incremented broken-lines illustrate an electronic device, the intermediate- length broken-lines illustrate a display screen boundary of the claimed design, and the still shorter broken-lines illustrate portions of the transitional graphical user interface. None of the broken lines form part of the claimed design.
