(57) **CLAIM**

The ornamental design for a display screen with an animated graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first image of a first embodiment of a display screen with an animated graphical user interface showing our new design;

FIG. 2 is a front view of a second image of the first embodiment of a display screen with an animated graphical user interface showing our new design;

FIG. 3 is a front view of a third image of the first embodiment of a display screen with an animated graphical user interface showing our new design;

FIG. 4 is a front view of a fourth image of the first embodiment of a display screen with an animated graphical user interface showing our new design; and

FIG. 5 is a front view of a fifth image of the first embodiment of a display screen with an animated graphical user interface showing our new design;

FIG. 6 is a front view of a first image of a second embodiment of a display screen with an animated graphical user interface showing our new design;

FIG. 7 is a front view of a second image of the second embodiment of a display screen with an animated graphical user interface showing our new design;

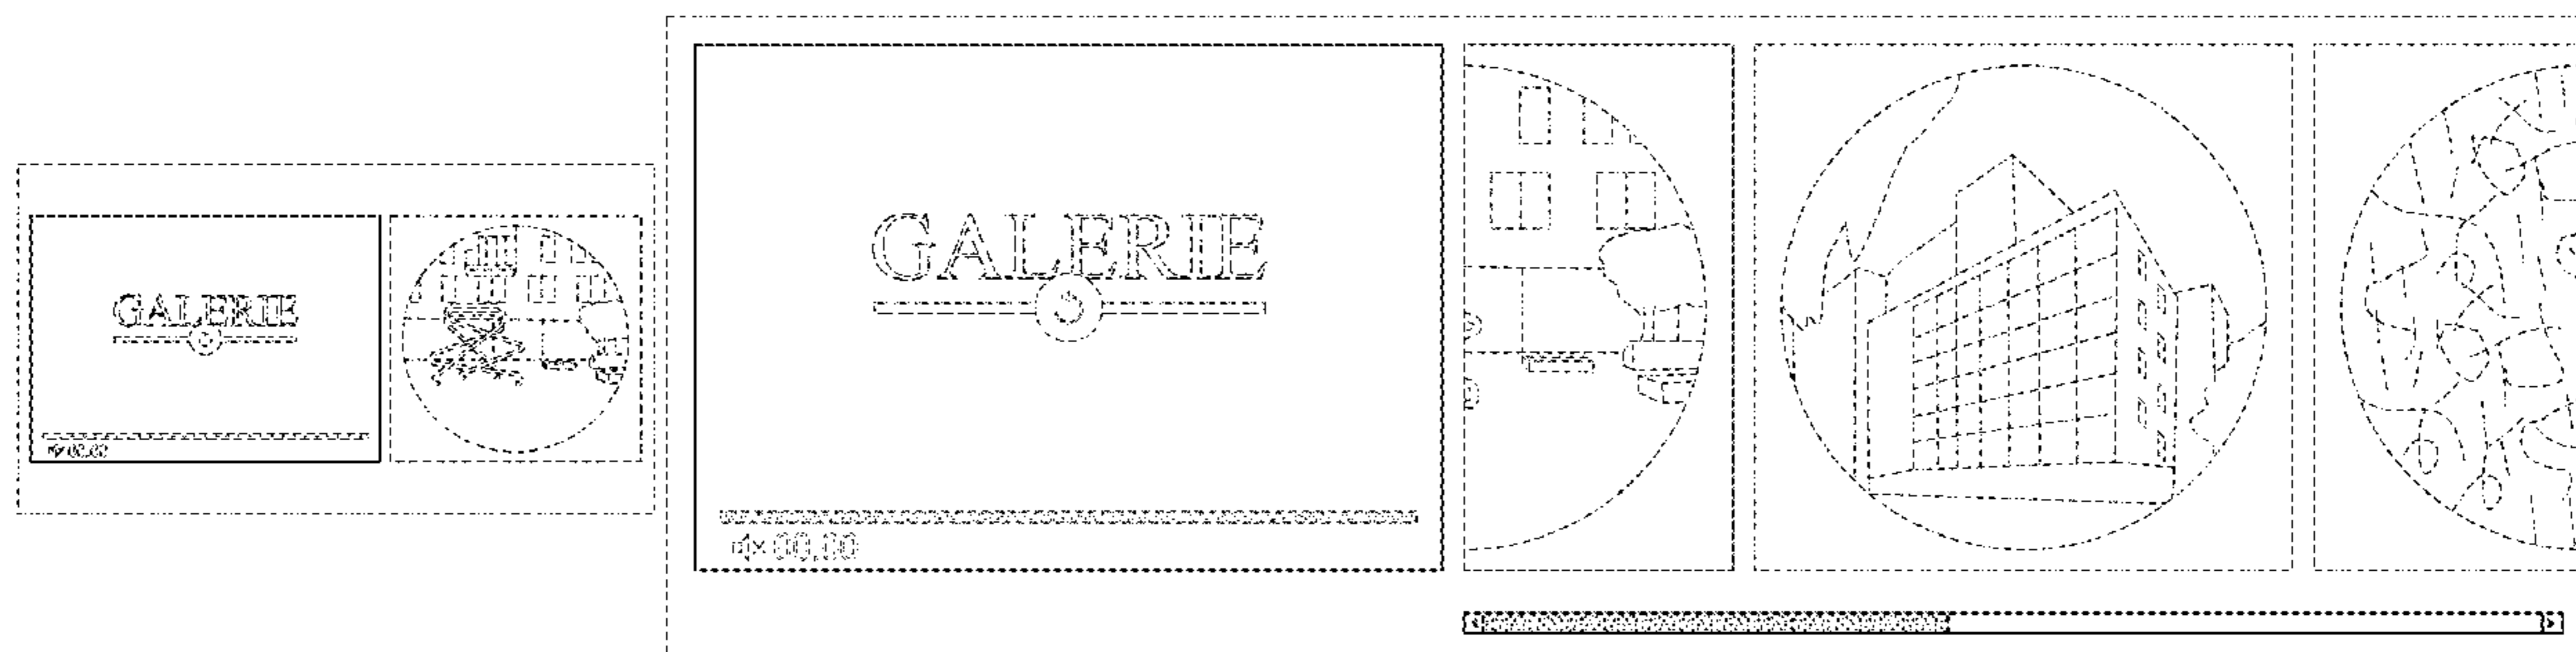

FIG. 8 is a front view of a third image of the second embodiment of a display screen with an animated graphical user interface showing our new design; and,

FIG. 9 is a front view of a fourth image of the second embodiment of a display screen with an animated graphical user interface showing our new design.

The broken line showing of a display screen or portion thereof illustrates portions of the article and does not form part of the claimed design. The remaining broken lines show portions of the animated graphical user interface that form no part of the claimed design.

The appearance of the first embodiment of the transitional image sequentially transitions between the images shown in FIGS. 1-5. The appearance of the second embodiment of the transitional image sequentially transitions between the images shown in FIGS. 6-9.
