(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with graphical user interface according to our new design, the view showing a first image in a sequence of movement of the graphical user interface;

FIG. 2 is another view thereof showing a second image in the sequence of movement of the graphical user interface; FIG. 3 is another view thereof showing a third image in the sequence of movement of the graphical user interface; FIG. 4 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface; FIG. 5 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface; FIG. 6 is a front view of a display screen with graphical user interface according to another embodiment of our new design, the view showing a first image in a sequence of movement of the graphical user interface; FIG. 7 is another view thereof showing a second image in the sequence of movement of the graphical user interface; FIG. 8 is another view thereof showing a third image in the sequence of movement of the graphical user interface; FIG. 9 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface; FIG. 10 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface; FIG. 11 is a front view of a display screen with graphical user interface according to another embodiment of our new design, the view showing a first image in a sequence of movement of the graphical user interface; FIG. 12 is another view thereof showing a second image in the sequence of movement of the graphical user interface; FIG. 13 is another view thereof showing a third image in the sequence of movement of the graphical user interface; FIG. 14 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface; FIG. 15 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface; FIG. 16 is a front view of a display screen with graphical user interface according to another embodiment of our new design, the view showing a first image in a sequence of movement of the graphical user interface; FIG. 17 is another view thereof showing a second image in the sequence of movement of the graphical user interface; FIG. 18 is another view thereof showing a third image in the sequence of movement of the graphical user interface; FIG. 19 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface;

(Continued)

FIG. 20 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface;
 FIG. 21 is a front view of a display screen with graphical user interface according to another embodiment of our new design, the view showing a first image in a sequence of movement of the graphical user interface;
 FIG. 22 is another view thereof showing a second image in the sequence of movement of the graphical user interface;
 FIG. 23 is another view thereof showing a third image in the sequence of movement of the graphical user interface;
 FIG. 24 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface;
 FIG. 25 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface;
 FIG. 26 is a front view of a display screen with graphical user interface according to another embodiment of our new design, the view showing a first image in a sequence of movement of the graphical user interface;
 FIG. 27 is another view thereof showing a second image in the sequence of movement of the graphical user interface;
 FIG. 28 is another view thereof showing a third image in the sequence of movement of the graphical user interface;
 FIG. 29 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface;
 FIG. 30 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface;
 FIG. 31 is a front view of a display screen with graphical user interface according to another embodiment of our new design, the view showing a first image in a sequence of movement of the graphical user interface;
 FIG. 32 is another view thereof showing a second image in the sequence of movement of the graphical user interface;
 FIG. 33 is another view thereof showing a third image in the sequence of movement of the graphical user interface;
 FIG. 34 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface;
 FIG. 35 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface;
 FIG. 36 is a front view of a display screen with graphical user interface according to another embodiment of our new design, the view showing a first image in a sequence of movement of the graphical user interface;
 FIG. 37 is another view thereof showing a second image in the sequence of movement of the graphical user interface;
 FIG. 38 is another view thereof showing a third image in the sequence of movement of the graphical user interface;
 FIG. 39 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface;
 and,
 FIG. 40 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-5, 6-10, 11-15, 16-20, 21-25, 26-30, 31-35, and 36-40, respectively. This process or period forms no part of the claimed design. The long and short dashed broken line showing of a mobile terminal in FIGS. 1-40 forms no part of the claimed design. The long and short dashed broken lines of any thickness (e.g., dense lines) form no part of the claimed design. The mobile terminal, display screen, and the text, numbers, symbols and images of the graphical user interface shown in broken line in FIGS. 1-40 depict subject matter that forms no part of the claimed design.
