DESCRIPTION

FIG. 1 is a front view of a first image in a sequence of a first embodiment of a display screen with transitional graphical user interface, showing our new design;
 FIG. 2 is a front view of a second image thereof;
 FIG. 3 is a front view of a third image thereof;
 FIG. 4 is a front view of a fourth image thereof;
 FIG. 5 is a front view of a first image in a sequence of a second embodiment of a display screen with transitional graphical user interface;
 FIG. 6 is a front view of a second image thereof;
 FIG. 7 is a front view of a third image thereof;
 FIG. 8 is a front view of a fourth image thereof;
 FIG. 9 is a front view of a first image in a sequence of a third embodiment of a display screen with transitional graphical user interface;
 FIG. 10 is a front view of a second image thereof; and
 FIG. 11 is a front view of a third image thereof.

The appearance of the display screen with transitional graphical user interface sequentially transitions between the images of the first embodiment shown in FIGS. 1-4, the images of the second embodiment shown in FIGS. 5-8, and the images of the third embodiment shown in FIGS. 9-11. The process or period in which one image transitions to another form no part of the claimed design.

The broken lines at the perimeter of the figures illustrate the display screen and the broken lines showing of text, numbers, and icons illustrate portions of the transitional graphical user interface. None of the broken lines form a part of the claimed design.
