The sole FIGURE is a front view of a display having a graphical user interface for a software directed at optimizing parallel execution or processes showing the design. The outermost broken line showing of a display screen illustrates the environment of the article of manufacture and forms no part of the claimed design. The remaining broken lines, showing portions of the graphical user interface such as icons and text, form no part of the claimed design. The dotted lines show smaller text and elements in the graphical user interface that form no part of the claimed design.
